Chairman's Statement

Tadesse Gemeda
Chairman, Board of Directors

On behalf of the Board of Directors and on my own behalf, I am honored to welcome you all to the 32nd Annual General Meeting (AGM) and 13th Extraordinary General Meeting of Shareholders of our Company. I would like to sincerely express my gratitude to you, our respected Shareholders, for coming to attend the General Meetings.

It is my privilege, on behalf of the Board of Directors, to present this Statement highlighting only the most salient features of the financial year ended June 30, 2026. The details of the performance of the fiscal year will, as always, be in the Directors' Report and the Financial Statements to follow.

Against a dynamic operating environment, the Company demonstrated the resilience of its business model and the effectiveness of its strategic priorities.

The Company delivered robust growth across all three principal business segments—Non-Life, Life Assurance and Takaful. Combined Gross Written Premiums increased by an impressive 33% during the financial year, reflecting continued expansion of our customer base, strengthening distribution capabilities and the increasing relevance of our insurance solutions across the market segments we serve.

Our General Insurance (Non-Life) business recorded over 35% growth rate in Gross Written Premiums, and reached Birr 5.05 billion as at June 30, 2026, demonstrating strong growth momentum across our commercial and retail portfolios.

The Long-term business grew by 19% and reached Birr 780.5million, reinforcing the Company's growing presence in the Life market. The results for the year reflect not only the strength of our business model and strategy but also the commitment of management and employees to disciplined execution, customer-centricity, prudent risk management and sustainable value creation.

Of particular significance was the exceptional performance of our Takaful business, which recorded a 102% growth over the Financial Year 2024/25. The substantial expansion of the Sharia compliant Takaful business underscores the growing demand for these insurance solutions and provides an important platform for the Company to broaden its business penetration and to reach the customer segments that were previously underserved.

Premium growth, however, is meaningful only when accompanied by quality and sustainable underwriting performance. I am, therefore, particularly pleased to report that the insurance service result from our General Insurance and Life businesses increased by 60% during the year.

The substantial improvement in the underwriting result demonstrates the strength of our operating model and reflects disciplined risk selection, sound pricing, effective portfolio and claims management, and operational efficiency. The Board remains committed to creating long term shareholder value.

In spite of the challenging market and competitive environment, our Company, once again, maintained its unbeatable market leadership position in the General Insurance among all the 18 private insurance companies and a dominant leader in the total market in Life and Health and the Takaful lines of business. Our market share too has shown significant improvement, reaching 11.3% in the industry as of June 30, 2026 in line with our strategic plan; a key indicator of improved performance.

Our Company's gross profit before tax registered an impressive growth of 65% reaching a new height of Birr 1.84 billion. Likewise, the growth registered in Net Profit After Tax was a remarkable 47%.

The Company's improved operating performance translated into a strong bottom-line outcome produced Earnings Per Share (EPS) of 42% in the financial year 2025/2026, representing a robust bottom-line result, an important measure of the value created for our Shareholders. This marvelous achievement in bottom-line result was attained against a capital base that hiked up by nearly 28% as at the end of the budget year. The strong performance in EPS reflects the combined benefits of premium growth, improved prudence in underwriting and disciplined management of the Company's resources. It also demonstrates the Board's continued focus on deploying resources responsibly and ensuring that business expansion translates into sustainable financial returns.

While we are encouraged by the results achieved during the year, the Board also remains conscious that the insurance industry continues to evolve rapidly. Changes in customer expectations, technology, regulation, competition, climate-related risks and the broader economic environment require insurers to remain agile, innovative and disciplined.

Our strategic priorities will, therefore, continue to centre on profitable growth, underwriting excellence, customer experience, digital transformation, product innovation, operational efficiency, prudent capital management and enterprise-wide risk management.

We will continue to invest in technology and data-driven capabilities and in our human resources to strengthen our execution capabilities and institutional readiness for the future. At the same time, we will

pursue opportunities to deepen insurance penetration and develop solutions that respond to emerging customer needs.

The continued expansion of a Takaful business will also remain an important component of our growth agenda, particularly given its potential to contribute to broader financial inclusion and extend the reach of insurance to new and the marginalized sector of the society.

Equally important is our commitment to maintaining a strong governance and risk management framework. As an insurer, our reputation and long-term sustainability depend fundamentally on the confidence placed in us by policyholders, shareholders, regulator, business partners and other stakeholders. We will, therefore, continue to uphold high standards of governance, transparency, risk oversight and regulatory compliance.

We are currently constructing a 36-storey skyscraper with a 4 level basement Headquarters building. The project is progressing well and will have an immense positive impact on the company's performance when completed. It will also increase efficiency by consolidating operations, elevate our brand prestige and visibility and serve as a long-term wealth, asset that appreciates over time against inflation.

On behalf of the Board, I wish to express our sincere appreciation to our valued Shareholders for their continued confidence and support. Your investment and trust provide the foundation upon which we continue to build the Company's future.

I also extend our gratitude to our policyholders and prospective customers whose continued confidence in us remains at the heart of our business. We are equally grateful to our regulators, business partners, brokers, agents, overseas intermediaries, reinsurers and other stakeholders for their valuable contributions to our progress.

Finally, I wish to commend the Executive Management team and every member of staff for their dedication, professionalism and commitment throughout the year. The achievements recorded in 2025/2026 are a collective accomplishment and demonstrate the strength of our people and the effectiveness of our strategy.

Lastly, it is with due respect that I formally submit, in accordance with Article 426 of the Commercial Code of Ethiopia, Proclamation No. 1243/2021, to you the Report of the Board of Directors and the Audited Financial Statements for the year ended June 30, 2026 for your kind consideration and approval.

Thank you.

Tadesse Gemeda
Chairman, Board of Directors

REPORT OF THE BOARD OF DIRECTORS

I. INTRODUCTION

The Board of Directors is delighted to present to the Shareholders of Awash Insurance S.C. the Annual Report and the Audited Financial Statements for the fiscal year (FY) ended 30 June 2026.

This Report presents a brief overview of the business landscape and highlights major performance indicators, milestone achievements, challenges and the prospects.

II. OPERATING (REMOTE) ENVIRONMENT

1. THE GLOBAL ECONOMY

The global economy, according to the IMF's July 2026 World Economic Outlook (WEO) update, has demonstrated resilience despite significant geopolitical, energy and technological disruptions.

The IMF projected global growth of 3.0% in 2026, and 3.4% in 2027. In 2025, world output grew by 3.5%.

However, the outlook remains uneven, with the ongoing effects of the Middle East conflict weighing particularly on energy-importing and vulnerable economies.

2. THE ADVANCED ECONOMIES

Growth in advanced economies, according to the IMF, is projected at 1.7% in 2026 and 1.8% in 2027. The US economy is projected to grow at 2.3% in 2026 and 2.2% in 2027. It grew by 2.1% in 2025. In the Euro area, growth is projected at 0.9% in 2026 and 1.2% in 2027.

3. THE EMERGING MARKET AND DEVELOPING ECONOMIES

3.1. THE GROUP

Growth in these markets is projected to slow down to 3.8% in 2026 before recovering to 4.5% in 2027. In 2025, these markets registered growth of 4.5%.

3.2. EMERGING AND DEVELOPING ASIA

China's, the other major economy, growth in 2026, is projected to slow down to 4.6% and to further decelerate to 4.1% in 2027. In 2025, it registered growth of 5.0%.

4. THE AFRICAN ECONOMY

4.1. THE REGIONAL GROWTH

Africa's average real GDP growth rose to 4.4% in 2025 (much higher than the global average of 3.5%) and is projected to moderate to 4.2% in 2026, according to the African Development Bank's 2026 African Economic Outlook (AEO).

The continent's real GDP growth is projected, according to the AEO, to recover to 4.4% in 2027, demonstrating continued resilience.

The same report conveys that the impact of the ongoing Middle East conflict on food, fuel and fertilizer prices will impact the growth outlook in 2026.

4.2. THE SUB-SAHARAN AFRICA (SSA)

Growth in Sub-Saharan Africa is expected to remain broadly stable at 4.3% in 2026, though substantial divergence exists across countries. The SSA, as a group, to which Ethiopia belongs, is forecasted to grow at 4.5% in 2027. In 2025, the SSA grew by 4.5%.

4.3. THE EAST AFRICA (EA)

The real GDP growth of the East African sub-region was 6.6% for 2025. Projections for 2026 and 2027 would be 5.9% and 6.4% respectively, according to the 2026 AEO (May 26, 2026).

At these GDP growth rates, East Africa, compared to the continental growth average and even to that of all other growing regions on the continent, remains the fastest-growing region in Africa.

The decline in real GDP growth from 6.6% in 2025 to 5.9% in 2026 reflects the impact of supply chain disruptions, due primarily to geopolitical tensions in the Middle East. The Crises in the Middle East have contributed to rising energy and import costs and intensified food-security vulnerabilities.

Board Chairman, CEO, one serving Board member, and seven former Board members posing for a group photograph following the 31st AGM

III. THE IMMEDIATE ENVIRONMENT

THE ETHIOPIAN ECONOMY

The Ethiopian economy maintained strong growth momentum, according to the AfDB. The GDP of Ethiopia is expected to register a strong growth of 7.8% in the 2025/26 FY. Forecasts for FY 2026/27 is a strong 8.7% performance supported by ongoing reforms to further liberalize the economy.

The main downside risks to the outlook include debt-distress situations, inflationary pressures, local and global geopolitical uncertainties, and climate-related shocks.

According to IMF's real GDP growth data, the Ethiopian economy is projected to grow at 9.3% for 2025/26 (FY 2018 E.C.) and at 8.6% for FY 2026/27. The IMF confirmed that real GDP expanded by 9.2% for FY 2024/25. Real GDP growth data obtained from the Ministry of Finance, April 2026, tallies with the IMF's.

IV. THE INSURANCE INDUSTRY

1. INDUSTRY OVERVIEW

The Ethiopian insurance industry recorded strong growth and continued to be financially resilient, according to the NBE, during the review period. The industry nevertheless remains at an early stage of development relative to the size and potential of the Ethiopian economy.

2. PREMIUM GROWTH AND MARKET DEVELOPMENT

Gross written premium reached ETB 49.947 billion in Non-Life as at 30 June 2026, representing an increase of 31.3% compared to the preceding fiscal year of 2024/25. General insurance remained overwhelmingly dominant, accounting for approximately 92.3% of the total gross written premiums (GWP).

Long-term business generated ETB 3.481 billion and accounted for 6.4% of the industry premiums. The Sharia-compliant Takaful insurance accounted for the remaining 1.2%, or about ETB 671.8 million. The Long-term and Takaful businesses registered growth rates of 32% and 43% respectively.

The strong premium growth momentum indicates increasing demand for insurance protection and an expanding customer and business base. Despite this strong growth, insurance penetration, that of life insurance in particular, remains a major structural challenge.

V. PERFORMANCE OF THE COMPANY

Our Company, Awash Insurance, delivered a robust 35% growth in Gross Written Premiums (GWP) in Non-Life for the financial year ended 30 June 2026, significantly outperforming the industry average. The compounded growth for all lines was close to 35%. The growth registered was a demonstration of resilience, the strength and clarity of our business strategy in the face of many challenges in the competitive environment.

BUSINESS PERFORMANCE AND PREMIUM GROWTH

1. NON-LIFE

The General Insurance grew by a remarkable 35% over the previous period. The written premiums increased by over 1.32 billion Birr in a year and reached Birr 5.05 billion.

The 35% growth in GWP is more than a measure of financial performance; it is a clear indication of sustained business momentum, growing market relevance, and strong execution. All classes in general insurance, except Bond, registered premium growth ranging from 9% upto 112%.

2. LIFE AND HEALTH BUSINESS

The Life and Health assurance business line generated Birr 780.5 million during the budget year under review. The growth of the Life segment was a modest 19% over the fiscal year 2024/25.

3. TAKAFUL BUSINESS

The Company's Takaful, Sharia compliant business line, recorded an exceptional growth of 102% in Gross Contributions (GC) during the year. This outstanding performance represents a significant acceleration in the Company's Takaful operations and reflects growing market acceptance and a strong indication of its potential for continued expansion.

4. BUSINESS PERFORMANCE CONSOLIDATED RESULTS

4.1. COMBINED UNDERWRITING OUTPUT

The Company delivered a strong and broad-based performance in the FY 2025/26, with all the three lines contributing to the overall growth momentum.

Non-Life and Life combined produced written premiums of over Birr 5.8 billion as at June 30, 2026. The consolidated GWPs of these two major lines showed a marvelous growth rate of 33%.

The Gross written premiums of all the three lines crossed the six-billion figure for the first time. The increment registered in just one year was over 1.586 billion Birr.

4.2. PORTFOLIO MIX, MARKET SHARE AND RETENTION

Alike that of the total industry, General insurance continued to weigh heavily in our book of account, constituting around 82.5%. Within the General Insurance, Motor remained the largest business line, accounting for 49% as at June 30, 2026. Political Violence & Terrorism (PVT), Fire and Engineering classes became a very distant second and third classes with a share of 17% for PVT and 8 and 7 percentage points for the rest respectively. This development is important for us because excessive concentration in Motor business exposes the Company to inflated claims.

As regards our Long-term business, its portfolio mix, as always, has continued to be dominated by Group Health, the Medical Expenses class, during the fiscal year. The Management has designed and begun implementing the proposed strategic initiatives to gradually dilute its dominance.

Likewise, the third major business line, the Takaful, was dominated by Motor Takaful during the year. It constituted 62%.

Our business retention ratio for Non-Life for the reporting period 2025/26 was 67%; the previous year it was 64%.

Our Company's market share as at June 30, 2026 has reached a remarkable 11.3% for all the three major lines of business. It was an impressive achievement attained as per the roadmap.

4.3. UNDERWRITING PERFORMANCE

Our Company recorded positive underwriting performance during the reporting period.

As can be seen from the IFRS Financial Statements for the year ended June 30, 2026, Corporate Underwriting result was impressive. Non-Life and Life combined witnessed a remarkable growth of 65% in underwriting profit over the FY 2024/25, exhibiting a sizeable increase to ETB 1.25 billion.

This exceptional growth reflects the strength of our business strategy, market positioning, customer confidence and the effectiveness of our distribution and underwriting capabilities.

4.4. FINANCIAL RESULTS

The fiscal year 2025/26 was a year compounded with significant developments like the war in the Middle East with an impact on our industry. The wider crisis in the other part of Middle East involving the State of Israel and the Palestinians, the prolonged Russia-Ukraine war have had significant impacts on the performance of the economy. Despite these challenges, Our Company, however, delivered a strong financial performance results during the year, demonstrating sustained improvement in our underwriting prudence, disciplined risk selection, effective portfolio management and operational efficiency.

On June 30, 2026, the consolidated insurance service result rose to Birr 1.254 billion from Birr 784.599 million in 2024/25, an increase by 60%. The stringent underwriting policy measures coupled with all other complementary policy instruments worked as drivers for the splendid results attained.

The net claims ratio for the FY ended June 30, 2026 in general insurance decreased to 49%. The decline was a good indicator that our Company was on the right track.

The improvement in core operating performance was further reflected in the Company's overall earnings with Profit before tax increasing by 65% over the preceding year.

The combined gross profit before tax registered a tremendous growth by Birr 727.7 million during the year and reached ETB 1.84 billion. The net profit for the year, after provision for tax, stood at Birr 1.41 billion.

The stronger growth in pre-tax earnings relative to underwriting profit underscores the broader resilience of the Company's financial performance and its ability to translate

operational gains into enhanced shareholder value.

The paid-up capital of our Company also increased by Birr 728.09 million reaching Birr 3.375 billion as at the Balance Sheet date.

Our Company delivered a very strong financial performance during the Fiscal year against the backdrop of many challenges in the competitive landscape. The financial performance registered reflects the strength and resilience of our core insurance business and disciplined financial management. This result underscores our commitment to sustainable profitability, prudent financial stewardship, and the creation of enduring value for our shareholders. Earnings per Share (EPS) weighed against the capital base that increased by 27.5%, was Birr 209 or 42 percent.

The Directors recommend that the net profit for the year be declared as dividend after deducting legal reserve, directors' allowance and 10% retained earnings. Our Shareholders are, however, encouraged to reinvest their dividends to settle their outstanding subscriptions, if any, to further consolidate their shareholdings.

4.5. DIVIDEND TAX AND DISASTER RISK RESPONSE FUND

The Board would like to disclose the new development regarding the Dividend Tax of past six years that the Company has paid following the final ruling at the Federal Supreme Court Cassation Bench on the appeal we filed on the case.
The court determined that profits derived from the shares and reinvested/reploughed for the settlements of subscriptions constitute dividends subject to Dividend Tax. The details are as follows;

The Company has paid a total of ETB 122.43 million in connection with the dividend tax assessment on profits reinvested by shareholders to increase their shareholdings during FY 2009-2014 E.C. This amount includes ETB 74.86 million in principal tax, ETB 46.07 million in interest, and ETB 1.5 million in penalties. Based on the External Auditor's opinion, the principal tax is recoverable from the shareholders, either through direct payment or deduction from their current dividend distributions. In addition, the dividend withholding tax rate has increased from 10% to 15%, and mandatory 1% contribution to the Disaster Risk Response Fund will be deducted from distributable dividends. These tax deductions and statutory contribution will apply to the Company's current and future dividend distributions.

VI. HIGHLIGHT ON NON-FINANCIALS

1. CHANNEL AND BUSINESS DEVELOPMENT

Our Company, during the fiscal year under review, continued to pursue a disciplined and forward-looking approach to the market and business development, with emphasis on sustainable growth, customer centricity and on strengthening the Company's long-term competitive positioning and advantage. The overall strategy in market and business development remained focused on translating market opportunities into profitable and sustainable business.

A. PHYSICAL CHANNELS

In line with its commitment to enhancing customer accessibility and service delivery across the country, the company expanded its distribution network during the year. Accordingly, two new branches were opened in Assosa and Semera, strengthening the Company's presence in emerging regional markets. Added to that, Lami kura contact office was launched in Addis Ababa to address growing demand in the area. On top of these, Arat kilo contact office was upgraded to a full-fledged branch level.

The Company will continue to expand its distribution channels (digital included) with the objective of improving market coverage and reach.

B. DIGITAL CHANNELS AND CUSTOMER CONVENIENCE

As part of its ongoing digitalization strategy, the Company introduced digital premium payment channels through Awash Bank's AwashBirr Pro platform and Ethio Telecom's Telebirr Super App.

These initiatives are expected to significantly improve our payment systems, accessibility, and operational efficiency by enabling customers to make premium payments through secure and user-friendly digital channels. This reflects the Company's commitment to leveraging technology to improve customer experience and service delivery.

C. STRATEGIC PARTNERSHIP

The Company entered into a landmark partnership with Ethiopian Airlines Group to provide comprehensive Travelers' health Insurance coverage to passengers traveling from, to, or through Ethiopia.

This strategic collaboration enhances customer convenience, expands the Company's market reach, and reinforces the strength and credibility of the Awash Insurance brand. The partnership also demonstrates growing international confidence in the Company's capabilities and service excellence.

D. PRODUCT DIVERSIFICATION AND FINANCIAL INCLUSION

The Company achieved a major breakthrough in its product development and financial inclusion agenda by securing a license from the National Bank of Ethiopia to undertake Microinsurance business as a formal line of operation. This achievement enables the Company to extend insurance protection to underserved and low-income segments of society.

Building on this milestone, the Company introduced several innovative insurance solutions, including Crop Insurance and insurance products designed for Micro, Small and Medium Enterprises (MSMEs). These initiatives have significantly expanded the Company's product portfolio while advancing financial inclusion.

2. HUMAN RESOURCE DEVELOPMENT

The Company continued to strengthen its human capital as a key enabler of its strategic aspirations and long-term journey to the highest level.

Unlike in the past, strategic focus was placed on developing talent, strengthening leadership capabilities, enhancing technical and professional competencies, and promoting a performance-driven culture.

Our Company created employment opportunities for ninety-five citizens during the budget year bringing the total number of permanent employees to 837 as at June 30, 2026.
Additional thirteen casual workers, contract employees, were offered jobs during the year; this brought the total workforce to 850 at June 2026. The gender mix was exactly fifty-fifty as at 30 June 2026 reflection of our management's commitment to affirmative action. Our Agency network gave opportunities for over 300 licensed agents working exclusively for Awash.

The Company also invested significantly in targeted trainings and human-capital development initiatives to ensure employees were technically equipped to respond effectively to evolving customer needs, regulatory requirements and industry dynamics.

Four hundred fifty-one employees received various trainings across multiple disciplines that included professional overseas trainings offered to forty four employees, at a total cost of Birr 42.28 million during the year.

Branch Managers Posing for a Group Photo with the CEO and Global Consultancy Trainer Following Training on Supervisory Management and Product Knowledge

3. CORPORATE SOCIAL RESPONSIBILITY (CSR)

CSR remains an integral part of our commitment to sustainable and responsible business. We, at Awash, recognize that our long-term success is closely linked to the well-being of the communities and environment in which we operate.

Through our CSR initiatives, we continue to support sustainable community development, promote environmental stewardship and contribute to deepening and creating shared value.

During the reporting period, the Company made significant progress in embedding Environmental, Social and Governance (ESG) principles into its operations and strategic decision-making processes. A comprehensive ESG governance framework was established to promote sustainable, ethical, and environmentally responsible business practices across the organization.

In recognition of its commitment and leadership in sustainability, the Company was selected by FSD Africa Cohort III Program as one of only ten insurance companies in Africa to receive specialized ESG Integration Technical Assistance. Notably, Awash Insurance remains the only insurance company in Ethiopia actively advancing ESG implementation on a voluntary basis, demonstrating its commitment to international best practices and sustainable value creation.

These efforts reflect our belief that responsible business goes beyond financial performance. It is about building trust, creating value and making a meaningful contribution to the communities we serve. Total of eleven charities, that included Makedonia, were supported. Environmental stewardship remained a key pillar of the Company's CSR agenda. In collaboration with our sister company, Awash Bank, our Company participated in national environment conservation initiatives in planting more than 20,000 avocado seedlings during the FY.

CEOs and Staff of the Sister Companies Participating in the Green Legacy Initiative

4. INVESTMENT

4.1. EQUITY INVESTMENT

Our Company's equity investments represent strategic investments made in various companies with the objective of generating long-term financial returns and creating sustainable value. They also support portfolio diversification and risk management agenda, on top of the enhancement of shareholders' value and stakeholder confidence.

The Board, therefore, had to carefully examine the proposals submitted to it by the Executive during the year. Following thorough examinations, the Directors decided on an additional equity investment of Birr 975 million in four companies. The Board also allowed the conversion of additional statutory deposit of Birr 108.259 million into Bond purchase. Added to that the Board decided on the purchase of DBE bond worth Birr 93.43 million.

4.2. FINANCIAL POSITION AND TOTAL INVESTMENT

Our Company's financial position continued to strengthen, with Total Assets expanding by 72% to Birr 19 billion, up from Birr 11.1 billion in 2024/25. Shareholders' fund rose to Birr 8.6 billion, a 72% rise from Birr 5 billion the previous year, reflecting a significant increase in paid up capital and other comprehensive income.

As at the end of the reporting period, the Company's total investments reached Birr 7.8 billion, reflecting a strong 127% rise over the past year.

4.3. PROGRESS IN CAPITAL MARKET PARTICIPATION

The Company achieved an important milestone in its capital market journey by appointing a Transaction Advisor and successfully completing the regulatory requirements necessary for the registration of its securities with the Ethiopian Capital Market Authority.

This achievement positions the Company among the pioneers in Ethiopia's emerging capital market and demonstrates its commitment to transparency, sound corporate governance, and long-term value creation for shareholders.

Our Company has also initiated and begun pursuing the Listing of our securities as this will position Awash Insurance as the most transparent and valued company both locally and overseas in the eyes of investors and the public.

4.4. NEW HEADQUARTERS BUILDING

The future Headquarters (HQs) building construction project has seen significant progress during the review year. The construction of 4B+G+35 storey HQs building project is one of the most important strategic investments in the Company's history.

In so far as our new HQs building represents a strategic investment in physical assets and the long-term value creation, the Board of Directors was rigorously following up its progress through providing the support it required and taking proper decisions on time to speed it up.

As reported last year, following the signing of the Contract for the Construction of Structural phases, a year ago, on July 3, 2025, the project showed momentum with a significant and measurable progress over the last twelve months.

Following mobilization and commencement of construction, the Project advanced through piling, excavation, foundation and basement works, culminating in the completion of the substructure and achievement of the ground-floor slab.

The project subsequently progressed into the superstructure phase and by the end of August 2026 has reached the fourth floor slab level. Cumulative construction progress has reached 36.89%, representing 92.47% of planned progress. Despite challenges including fuel shortages, construction material supply constraints and other challenges the Project maintained steady progress through coordinated management and stakeholder interventions, marking a significant milestone in the realization of this strategic investment.

Partial view of the New Headquarters building, with superstructure construction progressing to the fifth floor

VII. CORPORATE GOVERNANCE

During the Fiscal Year 2025/26, the Board of Directors effectively discharged its oversight and decision-making responsibilities in accordance with applicable laws, regulatory directives, and the Company's governance framework. The Board remained actively engaged in providing strategic direction, monitoring operational and financial performance, and ensuring prudent risk management. Key activities and accomplishments of the Board included the following:

1. The Board reviewed and approved a number of key corporate policies, including the Corporate Governance Policy, Planning and Budget Policy, Human Resource Management Policy and Policy on Legal and Advisory Services. The Board approved operational policies such as Agricultural and Micro insurance Policy, the Underwriting and Claims policies of Agriculture and Micro insurance business, establishing appropriate guidelines and specifying the principal features and requirements applicable to such insurance products;
2. In alignment with the Company's Investment Policy and long-term strategic objectives, the Board approved additional equity investments in Awash Bank S.C., Oda S.C. and EthioRe. The investment decisions were made following due consideration of their financial viability, strategic significance, expected returns, associated risks, and overall alignment with the Company's investment objectives;
3. The Board periodically reviewed the implementation status of the Company's strategic initiatives under the Vision 2030 Strategy. The Board assessed progress against strategic milestones, deliberated on implementation challenges, and provided strategic direction to the Management to address identified gaps and ensure the timely and effective execution of the Company's strategic priorities;
4. The Board exercised continuous oversight over the Company's financial reporting, internal control systems, risk management framework, as well as internal and external audit processes to ensure the integrity, reliability, and transparency of financial information and compliance with applicable laws and regulatory requirements. In particular, the Board monitored the preparation of the financial statements for the fiscal years 2023/24, 2024/25, and 2025/26 in accordance with the requirements of IFRS 17 and IFRS 9, with a view to ensuring that the financial statements present a true and fair view of the Company's financial position and performance;
5. The Board continuously monitored the implementation of the Company's New Headquarters Building Project through periodic review of reports in its monthly meetings covering construction progress, project timelines, budget utilization, financing arrangements, procurement activities, and risk mitigation measures. The Board provided strategic guidance and oversight to the management to ensure that the project is implemented effectively and completed in accordance with the approved Project Governance Plan;
6. The Board approved the Company's Information Technology Strategy and Information Technology Policy, recognizing the strategic importance of digital transformation in enhancing innovation, business growth, operational efficiency, service delivery, and overall organizational effectiveness;
7. The Board reviewed monthly and quarterly reports submitted by the Board Sub-Committees. The Sub-committees conducted their respective meetings regularly and submitted periodic reports and recommendations to the Board. The Board

considered the recommendations of the Sub-committees and provided appropriate guidance to the Management on matters related to corporate governance, internal control, regulatory compliance, risk management, human resource management, and organizational performance;

8. The Board received and reviewed quarterly off-site surveillance reports of the National Bank of Ethiopia. The Board deliberated thoroughly on the supervisory observations, findings, and recommendations and directed the Management to develop and implement appropriate corrective action plans to address the identified matters and strengthen the Company's regulatory compliance and control environment;
9. The Board approved the appointment of i-Capital Institute PLC as the Company's Transaction Advisor to undertake the development of the Prospectus, valuation, and registration of the Company's securities with the Ethiopian Capital Market Authority, in accordance with the Public Offering and Trading of Securities Directive No. 1030/2024. Accordingly, the Board endorsed the registration of the Company's existing securities with the Ethiopian Capital Market Authority and listing on the Ethiopian Securities Exchange (ESX);
10. In accordance with the Company's succession planning framework and corporate governance policies, the Board approved the appointment of Senior Executive Officers to key leadership positions, thereby ensuring leadership continuity, strengthening institutional capacity, and supporting the effective execution of the Company's strategic objectives;
11. The Board successfully facilitated and conducted the 31st Annual Ordinary General Meeting of Shareholders and provided appropriate instructions for the timely registration and authentication of the Minutes of the meeting. The Board subsequently monitored the implementation of resolutions adopted by the General Meeting and provided guidance on preparations for the 32nd Annual ordinary General Meeting of Shareholders;
12. The Board reviewed and approved the Company's Annual Operating (Business) Plan for the 2026/27 fiscal year. The Plan sets out the Company's strategic objectives, business priorities, financial targets, underwriting goals, investment strategies, operational initiatives, and key performance indicators for the fiscal year;
13. The Board regularly reviewed the Company's monthly and quarterly performance based on qualitative and quantitative performance reports and participated in the Mid-Year and Annual Performance Review Meetings. The Board recognized the Management and employees for the remarkable growth achieved and the Company's continued market leadership during the 2025/26 fiscal year. The Board assessed performance against the approved Business Plan and Strategic Plan, evaluated achievements and operational challenges, and provided strategic guidance to support the successful attainment of the Company's corporate objectives for the 2026/27 fiscal year;
14. The Board approved amendments to the existing salary scale in consideration of prevailing economic and inflationary conditions. The revised salary structure is intended to enhance employee motivation, competitiveness, and retention while supporting the Company's ability to attract and retain qualified and competent personnel;
15. Based on the Company's profitable performance during the 2025/26 fiscal year, where the Company collected a Gross Written Premium (GWP) of more than Birr 6.12 billion across all lines of business and maintained its position as a market leader

among private insurance companies, the Board approved salary increments and bonus payments for the Management and employees. Performance-based bonus also allowed for the CEO;

16. The 2024/25 Annual compensation limit of Birr 150,000.00 (One Hundred Fifty Thousand) and 2025/26 monthly allowance of Birr 10,000.00 (Ten Thousand) for Board of Directors were paid in line with the regulatory standard and the resolutions of the 31st Annual ordinary General Meeting of Shareholders. On the other hand, the annual gross salary and benefits paid to the CEO were Birr 5,832,000.00 (Five Million Eight Hundred Thirty Two Thousand) and Birr 600,000.00 (Six Hundred Thousand) respectively. Besides, a company car with fuel was provided to the CEO. There were no loans or securities extended to the Board Directors or the CEO;
17. During the fiscal year, the Board held 12 regular and 18 special meetings. The majority of Board Directors attended all meetings, while the remaining Directors maintained attendance above the minimum requirement of 75%. Through these meetings, the Board extensively considered Management reports and deliberated and resolved on matters of strategic, financial, operational, regulatory, and governance significance;
18. Following the Annual General Meeting, the Board successfully conducted the formal handover process from the outgoing Board to the newly appointed Directors. To ensure continuity and effectiveness of governance, the Board designated Directors to the respective Board Committees, taking into consideration their expertise, experience, and areas of competence. Furthermore, newly appointed Directors participated in relevant training programs designed to enhance their knowledge and skills in contemporary corporate governance practices, financial reporting, technology, and developments in the insurance industry and market environment;
19. The Board conducted semi-annual and annual evaluations of the effectiveness and performance of the Board as a whole, the Board Committees, and individual Board Directors. The results of the evaluations were duly documented, summarized, and filed with the National Bank of Ethiopia in accordance with applicable regulatory requirements; and
20. In fulfillment of its Corporate Social Responsibility commitments and contribution to sustainable social development, the Board approved financial contributions to various social development initiatives aimed at supporting communities and broader societal objectives.

Board Directors and the CEO

VIII. THE FUTURE: CHALLENGES AND PROSPECTS

A) CHALLENGES

The FY 2025/26 was a year, as in the past, dominated by challenges than opportunities. The Ethiopian Insurance industry, as always, on top of the ever toughening cut-throat competition, was navigating through a number of challenges during the review period such as: the escalation of claims costs (spare-part and labour costs and medical expenses in particular), the acute shortage of skilled and schooled manpower in the trade, the scramble over limited profitable businesses, unethical practices, and the awareness challenge all further compounded and deepened the problem of the industry.

The industry also faced the intensifying regulatory and supervisory expectations, evolving accounting and reporting requirements, increasing demands for transparency and customer protection and ever changing customer expectations, to mention a few industry-specific challenges among others. The industry also faced structural challenges in developing long-term (Life) business.

The Ethiopian insurance industry, infact, registered a remarkable growth of 31.3% in all lines in the FY 2025/26 against a backdrop of heightened uncertainty and rapidly evolving risk dynamics requiring insurers to balance growth ambitions with financial resilience.

On the external front, the persistent inflationary pressures, tightening financial conditions, and geopolitical tensions like the US-Israeli war on Iran, the wider Middle East crisis, the prolonged Russia-Ukraine war, disruptions to trade and supply chains, the rise in global oil prices, the tariff war, cyber threats continued to place pressure on both sides of insurer's balance sheets.

B) THE PROSPECTS

We are cautiously optimistic, as always, that the Ethiopian economy will continue exhibiting its resilience once again and keep its speedy growth momentum during the FY ahead. The national economy, according to independent sources, is forecasted to register real GDP growth of 7.8% as at June 2026 (2025/26). The Insurance industry's resilience will, on its part, ultimately depend not only on its ability to absorb emerging shocks but in its proactive decision to invest in digital technology, the human capital and in its capacity to anticipate changing risk landscapes.

The Ethiopian economy, according to the AfDB Group's latest report, is forecasted to maintain its strong growth momentum during the new FY of 2026/27 as well, at an 8.6% GDP growth rate. The strong performance outlook is supported by ongoing Homegrown economic reform program to further liberalize the economy, expected external debt treatment, revitalized external financing and betterment in the FDI, continued tight monetary policy, exchange-rate stability and foreign-currency generation and availability will all add up and strengthen the outlook.

For our industry as a whole, the emerging reform agenda should be viewed not merely as a regulatory obligation, but as an opportunity to reposition Ethiopian insurance from a relatively low-penetration financial service into a more inclusive, innovative and resilient pillar of the

national economy. Not only the Home Grown Economic Reform program, but the draft insurance Proclamation under consideration at the Parliament will hopefully advance the speedy growth industry agenda and serve as growth driver in the years to come.

On the downside, the multiple effects of El Niño on agrarian economies like ours that depend heavily on agriculture, heightened exposure to cyber risk, data-security breaches and technology-related operational disruptions, the inflationary situation, the rising operating expenses and the conflict and security challenge in the country are the major among the mentionable ones as risks.

Board of Directors, CEO, and top-performing branches
following the successful completion of the Annual Performance Review Meeting

IX. THE WAY FORWARD

The Ethiopian economy has continued to expand at a rate above sub-regional and regional (African) average. The national economy's growth was projected to accelerate further at 10.2% in FY 2025/26 (2018 E.C.), according to the Ministry of Finance (April 2026).

Looking forward, the local insurance industry seems to be standing at a crossroads. The Ethiopian insurance industry was operating in a rapidly transforming economic, regulatory and competitive environment. The intense competition, persistent and deepening price sensitivity among customers, low insurance penetration, limited public awareness all continued to constrain the expansion, at a desired pace, of the insurance business, notwithstanding the strong growth potential of the market.

The industry has also continued facing structural challenges in developing long-term (Life assurance) business, agricultural and climate-related solutions, micro-insurance and other innovative products.

The year 2025/26 was also characterized by an important period of regulatory and institutional transition. The National Bank of Ethiopia's ongoing work on a new insurance proclamation, including the proposed establishment of an independent Insurance Regulatory Authority and the contemplated opening of the sector to greater foreign participation, signals a fundamental evolution in the competitive and supervisory landscape.

The rapid advancement of digital financial services will create considerable opportunities for improving distribution, customer services (claims administration included) and financial inclusion.

The shortage of specialized insurance professionals, including actuarial and technical expertise in specialty classes, together with gaps in information-technology infrastructure remains an important constraint on the sector's ability to modernize at the pace required.

The period, therefore, underscores the imperative for insurers to strengthen underwriting discipline, improve claims management, invest in people and technology, diversify products and distribution channels, deepen risk-based pricing and enterprise risk management, reinforce capital and reinsurance protection, and build greater public trust in insurance as an essential instrument of financial resilience.

Digital innovation continues to be a top most priority among our strategic initiatives serving as a strategic growth catalyst and as a key instrument to unlock new market opportunities to strengthen operational efficiency. By leveraging technology and digital ecosystems, we are not only elevating the customer experience through greater simplicity and speed, but also strengthen operational resilience, competitiveness and long term enterprise value.

Lastly, the FY 2026/27 marks a year of decisive growth and strengthened market standing, positioning our Company, Awash, for a much stronger and more ambitious height of looking beyond the horizon to realize our "Breaking Away from the Pack" philosophy.

X. VOTE OF GRATITUDE

The Board of Directors wishes to express its deepest gratitude to all esteemed customers of Awash Insurance S.C. for their support and patronage. The Board also highly appreciates the continuous support and business opportunities provided by its shareholders who also have rallied undividedly behind their company to ensure the continued success of Awash Insurance s.c..

Our gratitude also goes to the reinsurers, the intermediaries (both local and international) and all other business partners for their support. The Board would like to accord its sincere appreciation to the NBE, and the Management and entire staff of the sister Company, Awash Bank, for their cooperation and backing based on solid principles and mutual benefits.

A special gratitude is due to the Management and whole staff of our Company, Awash Insurance, who have played and continue to play a pivotal role to assure the Company's commendable success and fast growth as per the plan. We thank you all once again; without your determinations and valuable contributions through unmatched team spirit the grand results achieved would not have been possible.

Thank you.

Statement of Directors' Responsibilities
For the year ended 30 June 2026

In accordance with the Financial Reporting Proclamation No. 847/2014 and Insurance Business Proclamation No.746/2012, as amended by the Insurance Business (Amendment) Proclamation No.1163/2019, all reporting entities established in accordance with the Ethiopian law or operating in Ethiopia are to prepare financial statements in accordance with the International Financial Reporting Standards.

The Company's Management is responsible for the preparation and fair presentation of these financial statements in conformity with International Financial Reporting Standards and in the manner required by the Commercial Code of Ethiopia in conformity with International Financial Reporting Standards and in the manner required by the Commercial Code of Ethiopia, Proclamation No. 1243/2021 and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Company is required to keep such records as are necessary to:

A) exhibit clearly and correctly the state of its affairs;

B) explain its transactions and financial position; and

C) enable the National Bank of Ethiopia to determine whether the Company had complied with the provisions of the Insurance Business Proclamation, regulations and directives issued for the implementation of the aforementioned Proclamation.

The Management is responsible for the maintenance of accounting records that may be relied upon in the preparatation of the financial statements as well as adequate systems of internal control.

The Board of Directors (the Board) submits to the Auditors the annual financial statements which have been prepared by the Management using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with International Financial Reporting Standards, Insurance Business Proclamation, Commercial Code of 2021 as well as the requirements of the Accounting and Auditing Board of Ethiopia and the relevant Directives issued by the National Bank of Ethiopia.

The Board is of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Company and of its profit or loss.

Nothing has come to the attention of the Board to indicate that the Company will not remain a going concern for at least twelve months from the date of this statement.

Sharia'h Advisory council's report
For the year ended 30 June 2026

Adil Abdullahi
Chairman
Sharia'h Advisory Council

Sheik Sultan Haji Aman
Sharia'h Advisory Council Member

Dr. Mohammedhakim Ahmed Hasen
Sharia'h Advisory Council Member

Statement of the Sharia'h Advisory Council

The Council held 12 meetings during the financial year. All the members of the Council attended the meetings.

We, Adil Abdullahi, Sheik Sultan Haji Aman and Dr. Mohammedhakim Ahmed Hasen, members of the Sharia'h Advisory Council of Takaful Window Operation of Awash Insurance S.C. hereby confirm on behalf of the Sharia'h Advisory Council that strategic support was provided to the Company's Takaful Window Operation under 'Salaam Takaful' and the operations of the Company's Takaful business for the financial year ended June 30, 2026 was conducted in conformity with the Sharia'h requirements.

Regarding the financial result of the fiscal year 2025/26, The Advisory Council has examined the financial statements of Takaful window operation for the financial year 2025/26 . Upon considering the the provisions of Article 5 of " A Directive to License a Takaful Window operator Number STB/1/2020", we, the members of the Sharia'h Advisory Council, have unanimously endorsed the financial statement of Takaful window operation for the financial year 2025/26 .

Signed on behalf of the Sharia'h Advisory Council

INDEPENDENT AUDITOR'S REPORT ON FINANCIAL STATEMENTS OF AWASH INSURANCE S.C.

TO THE SHAAREHOLDERS OF THE AWASH INSURANCE S.C.

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Awash Insurance S.C, which comprise the statement of the financial position as at 30 June, 2026, and the statement of profit or loss and other comprehensive Income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give true and fair view of the financial position of the Company as at 30 June 2026 and of its statements of profit or loss and other comprehensive income and its cash flows for the year then ended in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Awash Insurance S.C in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code), as applicable to audits of financial statements of public interest entities, together with the ethical requirements that are relevant to our audit of the financial statements in Ethiopia, and we have fulfilled our other ethical responsibilities in accordance with those requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors is responsible for the other information. The other information comprises the Directors' Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Directors' Report and, in doing so, consider whether the Directors' Report is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Ethio-China Friendship Street, Wengelawit Tadesse Building 1st Floor
Tel. +251 71 150 0100, +251 71 150 0200, +251 71 150 0500 - Mob. (093) 001 4106, (091) 151 5038 / 39
e-mail: info@tayauditing.com - www.tayauditing.com - P.O. Box 1335 - Addis Ababa, Ethiopia

If, based on the work we have performed, we conclude that there is a material misstatement in the Directors' Report; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Management and those Charged with Governance for the Financial Statements

The Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting policies of the Company and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Company report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or taken together, they could reasonably be expected to influence the economic decisions of users taken because of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to

modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonable be thought to bear on our independence, and where applicable, action taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statement of the current period and are therefore the key audit matters. We describe these, matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Commercial Code of Ethiopia Proclamation No. 1243/2021, and based on our audit, we report as follows:

   - Pursuant to Article 349(1) of the Commercial Code of Ethiopia, we have carried out our duties in accordance with ISAs as described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report and, based on our review of the Directors' Report, we have not noted any matter that we need to bring to your attention.

   - Pursuant to Article 349(2) of the Commercial Code of Ethiopia, we recommend approval of the financial statements by the shareholders of Awash Insurance S.C.

   - Pursuant to Article 349(3) of the Commercial Code of Ethiopia, based on our review of the Board of Directors' proposal for distribution of profits, as we have not noted any matter that we need to bring to your attention. We therefore recommend approval of the proposed for distribution of profit

The engagement partner on the audit resulting in this independent auditor's report is Ato Yeheyis Bekele BA, FCCA.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

1 General information

Awash Insurance S.C. ("the Company") is a private commercial insurance company domiciled in Ethiopia. The Company was established on 1 October 1994 in accordance with the provisions of the Commercial Code of Ethiopia in conformity with International Financial Reporting Standards and in the manner required by the Commercial Code of Ethiopia , Proclamation No. 1243/2021 and sebsequently by the Insurance Business Proclamation No.746/2012 as amended by the Insurance Business (Amendment) Proclamation No.1163/2019 . The registered office is at:

Awash Towers,
Ras Abebe Aregay Street,
Addis Ababa,
Ethiopia.

The Company is principally engaged in the provision of general and life insurance services to clients in Ethiopian market.

2 Summary of significant accounting policies

2.1 Introduction to summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.2 Basis of preparation

The financial statements for the year ended 30 June 2026 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Additional information required by Ethiopian laws including Insurance Business Proclamation No. 746/2012, as amended by the Insurance Business (Amendment) Proclamation No.1163/2019 and Financial Reporting Proclamation No. 847/2014 are included where appropriate.

The financial statements comprise the statement of profit or loss and other comprehensive income, the statement of financial position, the statement of changes in equity, the statement of cash flows and the notes to the financial statements.

The financial statements have been prepared in accordance with the on going concern principle under the historical cost concept except for financial assets and liabilities which are determined under IFRS9 and IFRS17. Buildings and vehicles are measured at fair value at deemed cost.

All values are rounded to the nearest thousand, except when otherwise indicated. The financial statements are presented in thousands of Ethiopian Birr (Birr' 000).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires Management to exercise its judgment in the process of applying the Company's accounting policies. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions changed. Management believes that the underlying assumptions are appropriate and that the Company's financial statements therefore present the financial position and results fairly.

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 3.

2.2.1 Going concern

The financial statements have been prepared on a going concern basis. The Management has no doubt that the Company would remain in existence after 12 months.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.2.2 Changes in accounting policies and disclosures

The Company applied the following standards.

IFRS 17 establishes specific principles for the recognition and measurement of insurance contracts issued and reinsurance contracts held by the Company.

The company being engaged in insurance business classifies its contracts into insurance contracts and reinsurance contracts.
Under IFRS 17, the Company's insurance contracts issued and reinsurance contracts held are all eligible to be measured by applying the Premium Allocation Approach (PAA).
The PAA simplifies the measurement of insurance contracts in comparison with the general model in IFRS 17.

The measurement principles of the PAA differ from the 'earned premium approach' used by the Company under IFRS 4 in the following key areas:
The liability for remaining coverage reflects premiums received less deferred insurance acquisition cash flows and less amounts recognized as revenue for insurance services provided.
Measurement of the liability for remaining coverage involves an explicit inclusion of risk adjustment for non-financial risk when a group of contracts is onerous in order to calculate a loss component.

Measurement of the liability for incurred claims is determined on a discounted probability-weighted expected value basis and includes an explicit risk adjustment for non-financial risk. The liability for incurred claims includes the Group's obligation to pay other incurred insurance expenses.

The liability for remaining coverage and liability for incurred claims are presented separately for insurance contracts issued and reinsurance contracts held.

b) Changes to Presentation and Disclosure

For presentation of statement of financial position for the year, the Company aggregates insurance contracts issued, and reinsurance contracts held, respectively and presents separately:

- Portfolio of insurance issued that are assets.
- Portfolio of insurance issued that are liabilities.
- Portfolio of reinsurance contracts held that are assets.
- Portfolio of reinsurance contracts held that are liabilities.

The portfolio referred to above are those established at initial recognition in accordance with IFRS 17 requirements.

The line-item description in the statement of profit or loss and other comprehensive income that have been changed significantly compared with the last year are as follows:

Previously Reported Under IFRS 4:

- Gross premiums written.
- Net earned premiums.
- Gross claims incurred and policyholder benefits expenses.
- Net claims and benefits

Instead, IFRS 17 requires a separate presentation of:

Insurance revenue
Insurance service expenses
Net Expenses From reinsurance Contracts Held
Finance Expenses From Insurance Contracts
Finance Expenses From Reinsurance Contracts
Insurance and Reinsurance Contracts

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Definition and Classification

Insurance contracts are contracts under which the Company accepts significant insurance risk from an insurer by agreeing to compensate the insurer if a specified uncertain future event adversely affects the insurer.
In making this assessment, all substantive rights, and obligations, including those arising from law or regulation, are considered on a contract-by-contract basis. The Company uses judgement to assess whether a contract transfers insurance risk (i.e. if there is scenario with commercial substance in which the Company has the possibility of a loss on a present value basis) and whether the accepted insurance risk is significant.

The Company uses reinsurance agreements, to reduce its exposure to risks assumed, to increase its aggregate underwriting capacity. The ceding of risk to reinsurer does not relieve the Company from its direct obligations to its insured.
The Company does not write any investment contract with discretionary participation features or reinsurance contracts with direct participation features.

Recognition
The Company recognizes groups of insurance contracts it issues from the earliest of the following:
- The beginning of the coverage period of the group of contracts
- The date when the first payment from a policyholder in the group is due or when the first payment is received if there is no due date
- For a group of onerous contracts, if facts and circumstance indicate that the group is onerous.

The Company recognizes a group of reinsurance contracts held, it has entered into, from the earlier of the following:
- The beginning of the coverage period of the group of reinsurance contracts held.
- The date the company recognizes an onerous group of underlying reinsurance contracts held at or before that date.

Contract Boundary
The Company includes in the measurement of a group of insurance contract all the future cash flows within the boundary of each contract in the group. Cashflows are within the boundary of an insurance contract if they arise from substantive rights and obligations that exist during the reporting period in which the Company can compel policy holders to pay the premiums, or in which the Company has a substantive obligation to provide insurance contract services ends when:
The Company has the practical ability to reassess the risks of the portfolio of insurance contracts that contain the contract and, as a result, can set a price or level of the benefits that fully reflects those risks;

Both of the following criteria are satisfied:
- The Company has the practical ability to reassess the risks of the portfolio of insurance contracts that contain the contract and, as result, can set a price or level of benefits that fully reflects the risks of that portfolio,
- The pricing of the premiums up to the date when risks are assessed does not take into account the risks that relate to periods after reassessment date.

A liability or asset relating to expected premiums or claims outside the boundary of the insurance contract is not recognized. Such amounts relate to future insurance contracts.

Insurance Contracts Initial Measurement
The Company applies the premium allocation approach (PAA) to all the insurance contracts that it issue and reinsurance contracts it holds, as:
- The coverage period of each contract in the group is one year or less, including insurance contract services arising from all premiums within the contract boundary; or
- For contracts longer than one year, the Company has done Simple PAA Eligibility test to check the proportion of the premium of these contracts compared to the entire premium.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

For a group of contracts that is not onerous at initial recognition, the Company measures the liability for the remaining coverage as follows:

- The premiums. If any, received at initial recognition,
- Minus any insurance acquisition cashflows at the date
- Plus or minus any amount arising from the derecognition at the date of the asset recognized for insurance acquisition cashflow and
- Any other assets or liability previously recognized for cash flows related to the group of contracts that Company pays or receives before the group of insurance contracts recognized.

Where facts and circumstances indicate that contracts are onerous at initial recognition, the Company performs additional analysis to determine if net outflows is expected from the contract. Such onerous contracts are separately grouped from other contracts and the Company recognises a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the fulfillment cashflows. A loss component is established by the Company for the liability for remaining coverage for such onerous group depicting the losses recognized.

Subsequent Measurement

The Company measures the carrying amount of the liability for the remaining coverage at the end of each reporting period as the liability for the remaining coverage at the beginning of the period:

- Plus premiums received in the period
- Minus insurance acquisition cashflows
- Plus or minus any amount arising from the derecognition at that date of the asset recognized for insurance acquisition cashflows
- Plus any amounts relating to the amortization of the insurance acquisition cashflows recognized as an expense in the reporting period for the group
- Plus any adjustment to the financing component, where applicable
- Minus the amount recognized as insurance revenue for the services provided in the period
- Minus any investment component paid or transferred to the liability for incurred claims.

The Company estimates the liability for incurred claims as the fulfilment cashflows related to incurred claims. The fulfilment cashflows incorporate, in an unbiased way, all reasonable and supportable information available without undue cost or effort about the amount, timing and uncertainty of those future cashflows, they reflect current estimates from the perspective of the Company and include an explicit adjustment for non-financial risk (risk adjustment).

Reinsurance Contracts Initial Measurement

The Company measures its reinsurance assets for a group of reinsurance contracts that it holds on the same basis as insurance contracts that it issues. However, they are adapted to reflect the features of reinsurance contracts held that differ from insurance contracts issued, for example the generation of expenses or reduction in expenses rather than revenue.

Where the Company recognises a loss on initial recognition of an onerous contract group of underlying reinsurance contracts or when further underlying onerous reinsurance contracts are added to a group, the Company establishes a loss -recovery component of the asset for the remaining coverage for a group of reinsurance contracts held depicting the recovery of losses.

The Company calculates the loss-recovery component by multiplying the loss recognized on the underlying insurance contracts and the percentage of Reinsurance UPR on the underlying insurance contracts the Company expects to recover from the group of reinsurance contracts held.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Subsequent Measurement

The subsequent measurement of reinsurance contracts held follows the same principle as those for insurance contracts issued and has been adapted to reflect the specific features of reinsurance held.

Modification & Derecognition

The Company derecognizes insurance contract when:
- The rights and obligations relating to the contract are extinguished (i.e. discharged, cancelled or expired), or
- The contract is modified such that the modification results in a change in the measurement model or the applicable standard for measuring a component of the contract, substantially changes the contract boundary, or requires the modified contract to be included in a different group. In such cases, the Company derecognizes the initial contract and recognises the modified contract as a new contract.

Insurance Acquisition Cashflow

Insurance acquisition cashflows arise from the costs of selling, underwriting and starting a group of insurance contracts (issued or expected to be issued) that are directly attributable to the portfolio of insurance contracts to which the group belongs.

Presentation

Portfolios of insurance contracts that are assets and those that are liabilities, and portfolios of reinsurance contracts that are assets and those that are liabilities, are presented separately in the statement of financial position. Any assets or liabilities recognised for cash flows arising before the recognition of the related group of contracts (including any assets for insurance acquisition cash flows under (iii)) are included in the carrying amount of the related

The Company disaggregates amounts recognised in the statement of profit or loss and OCI into:

A insurance service result, comprising insurance revenue and insurance service expenses; and insurance finance income or expenses.

Income and expenses from insurance contracts are presented separately from income and expenses from insurance contracts

Income and expenses from reinsurance contracts, other than reinsurance finance income or expenses, are presented on a net basis as 'net expenses from reinsurance contracts' in the reinsurance service result.

The Company does not disaggregate changes in the risk adjustment for non-financial risk between the insurance service result and insurance finance income or expenses.

All changes in the risk adjustment for non-financial risk are included in the insurance service result.

Insurance revenue

The insurance revenue for the period is the amount of expected premium receipts (excluding any investments component) allocated to the period. The Company allocated the expected premium receipts to each period of the insurance contract services on the basis of the passage of time. But if the expected patter of release of risk during the coverage period differs significantly from the passage of time, then the allocation is made on the basis of the expected timing of incurred insurance service expenses.
The Company changes the basis of allocation between the two methods above as necessary, if facts and circumstances change. The change is accounted for prospectively as a change in accounting estimate. For the periods presented, all revenue has been recognized on the basis of passage of time.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Insurance service expenses
Insurance service expenses arising from insurance contracts are recognised in profit or loss generally as they are incurred. They comprise the following items.

- Incurred claims and other insurance service expenses:
- Amortisation of insurance acquisition cash flows: For contracts measured under the PAA, the Company amortizes insurance acquisition cashflows on a straight-line basis over the coverage period of the group of contracts.
- Losses on onerous contracts and reversals of such losses.
- Adjustments to the liabilities for incurred claims that do not arise from the effects of the time value of money, financial risk and changes therein.
- Impairment losses on assets for insurance acquisition cash flows and reversals of such impairment losses.

Net Income Or Expenses From reinsurance Contracts Held
The Company presents separately on the face of statement of profit and loss, the amounts expected to be recovered from insurers, net of allocation of the insurance premiums paid.

Insurance Finance Income And Expenses
Insurance finance income or expenses comprise the change in the carrying amount of the group of insurance contracts arising from:

- Future Cashflows Flow (FCF) and comprising the Present Value of Future Cash Flow (PVFC) with an appropriate
- The effect of the time value of money and changes in the time value of money; and
- The effect of financial risk and changes in financial risk.

The Company allocates reinsurance finance income or expenses on insurance contracts issued to profit or loss.

Discount Rates

The Company adopts a bottom-up approach in deriving the appropriate discount rates.
Under this approach, this discount rate determined is the risk-free yield adjusted for differences in liquidity characteristics between the financial assets used to derive the risk- free yield and the relevant liability cashflows (known as illiquidity premiums).

Risk Adjustment
IFRS 17 requires entities to measure reinsurance contracts at initial recognition as the sum of the following items:

- Future Cash Flow (FCF) and comprising the Present Value of Future Cash Flows (PVFCF) with an appropriate
- Risk Adjustment (RA) for non-financial risk.

The risk adjustment for non-financial risk is the compensation that the entity requires for bearing the uncertainty about the amount and timing of cashflows that arises from non-financial risk.

Derivation Of The Risk Adjustment

The Company has determined that the derivation of the risk adjustment shall be performed at the operating level using an appropriate methodology that is in line with IFRS17 guidelines

The Risk Adjustment for the Liability for Incurred Claims (LIC) has been estimated Value at Risk Method.

The Company applies judgement to determine the appropriate Risk Adjustment based on the non-financial risks associated with their portfolios of insurance and reinsurance contracts to determine the desired Risk Adjustments.
The Company will set confidence level in the range of the 60th to 90th percentile,

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

IFRS 9
IFRS 9: Financial Instruments

This section outlines the accounting policies applied in accordance with IFRS 9 - Financial Instruments. The company applies IFRS 9 for all financial assets and liabilities.

The accounting policies for financial instruments are set out below:

a) The Company's Financial Instruments

The Company's financial instruments include cash and cash equivalents, deposits with financial institutions, government securities, trade and insurance receivables, staff loans and other payables.

b) Classification and Measurement

On initial recognition, financial assets are classified into one of the following categories:

Amortised cost
Financial assets held to collect contractual cash flows, where such cash flows represent solely payments of principal and interest (SPPI).
Examples: deposits, government securities held to maturity, trade and insurance receivables.

Fair value through other comprehensive income (FVOCI)
Debt instruments held to collect contractual cash flows and for sale, meeting the SPPI criteria.

Equity instruments not held for trading may also be designated as FVOCI at initial recognition.

Fair value through profit or loss (FVTPL)
Financial assets that do not meet the criteria for amortised cost or FVOCI.

Financial liabilities are measured at amortised cost, unless designated at FVTPL to eliminate accounting mismatches.

c) Recognition, Reclassification and Derecognition

Financial assets and liabilities are recognised when the Company becomes a party to the contractual terms of the instrument.

A financial asset is derecognised when contractual rights to cash flows expire or are transferred and the Company has transferred substantially all risks and rewards.

A financial liability is derecognised when the obligation is discharged, cancelled or expires.

d) Subsequent Measurement

Amortised cost: Measured using the effective interest method, less any impairment losses.

FVTPL: Measured at fair value, with gains and losses recognised in profit or loss.

FVOCI: Measured at fair value, with changes recognised in OCI (except for impairment and interest on debt instruments, which are recognised in profit or loss).

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

e) Fair Value Measurement

Fair values are determined in accordance with IFRS 13 using the following hierarchy:

Level 1: Quoted prices in active markets.
Level 2: Observable inputs other than Level 1 prices.
Level 3: Unobservable inputs.

Carrying amounts of financial assets and liabilities measured at amortised cost approximate their fair values due to their short-term nature.

f) Impairment of Financial Assets (Expected credit loss (ECL) model)

The Company applies the expected credit loss (ECL) model to financial assets measured at amortised cost and debt instruments at FVOCI.

General approach:
Stage 1: 12-month ECL for assets without significant increase in credit risk.
Stage 2: Lifetime ECL where credit risk has increased significantly.
Stage 3: Credit-impaired assets (objective evidence of default).

ECL Calculation: ECLs are calculated based on three probability-weighted scenarios to measure expected cash
Key Elements Include:
Probability of Default (PD): Estimate of likelihood of default over a given time horizon.
Exposure at Default (EAD): Estimate of exposure at a future default date.
Loss Given Default (LGD): Estimate of the loss incurred if default occurs.

Simplified approach for trade and insurance receivables:
Loss allowances are measured at lifetime ECL using a provision matrix based on historical default rates and forward-looking information.

Write-off:
Financial assets are written off when there is no reasonable expectation of recovery.

g) Offsetting

Financial assets and liabilities are offset only when the Company has a legally enforceable right and intends to settle on a net basis or simultaneously.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

New Standards, amendments, interpretations issued but not yet effective.

IFRS 18 Presentation and Disclosure in Financial Statements

IFRS 18 was issued by the International Accounting Standards Board (IASB) in April 2024 and is effective for annual reporting periods beginning on or after 1 January 2027. IFRS 18 replaces IAS 1 Presentation of Financial Statements and introduces new requirements relating to the presentation of financial performance, including new mandatory subtotals in the statement of profit or loss, disclosures of management-defined performance measures, and enhanced aggregation and disaggregation requirements.
The Company is currently assessing the impact of IFRS 18 on the presentation and disclosure of its financial statements. Based on the assessment performed to date, the Company expects the standard to primarily affect the presentation and disclosure of financial information and does not expect it to have a material impact on the recognition and measurement of assets, liabilities, income, or expenses. The assessment is ongoing.

IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information and IFRS S2 Climate-related Disclosures

The International Sustainability Standards Board (ISSB) issued IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information and IFRS S2 Climate-related Disclosures, effective for annual reporting periods beginning on or after 1 January 2024.
IFRS S1 requires an entity to disclose material information about sustainability-related risks and opportunities that could reasonably be expected to affect the entity's cash flow, access to finance or cost of capital over the short, medium or long term.
IFRS S2 specifically requires disclosure of material information about climate-related risks and opportunities that could reasonably be expected to affect the entity's prospects.
The Company is assessing the implications of IFRS S1 and IFRS S2, including the identification and assessment of sustainability-related and climate-related risks.

2.3 Foreign currency translations

a) *Functional and presentation currency*

Items included in the financial statements are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The functional currency and presentation currency of the Company is the Ethiopian Birr.

b) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at exchange rates of monetary assets and liabilities denominated in currencies other than the Company's functional currency are recognized in profit or loss within other (loss)/ income. Monetary items denominated in foreign currency are translated using the closing rate as at the reporting date.

Foreign currency translation

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analyzed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortized cost are recognized in profit or loss, and other changes in carrying amount are recognized in other comprehensive income.

Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets measure at fair value, such as equities classified as available for sale, are included in other comprehensive income.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.4 Cash and cash equivalents

Cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash in hand, deposits held at call with Banks and other short-term highly liquid investments with original maturities of three months or less.

For the purposes of the cash flow statement, cash and cash equivalents include cash in hand and cash at bank.

2.5 Financial instruments - initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

2.5.1 Financial assets

Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, the Company's financial assets are classified into two categories:

- at amortised cost
- at fair value basis

a) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in interest and similar income in income statement. The losses arising from impairment are recognized in income statement in loan impairment charge.

The Company's loans and receivables comprise of insurance receivables, investment securities and other financial assets. Receivables arising from insurance contracts are classified in this category and are reviewed for impairment as part of the impairment review of loans and receivables.

Qard al hasan, an interest free loan provided under Takaful operation, is classified at its own class of asset whereby the discount rate is nil.

b) Fair value through other comprehesive income

Fair value through other comprehesive income, investments include equity investments. Equity investments classified as fair value through other comprehesive income.

After initial measurement, fair value through other comprehesive income, financial investments are subsequently measured at fair value with unrealized gains or losses recognized in other comprehensive income and credited in the Fair value through other comprehesive income reserve until the investment is derecognized, at which time the cumulative gain or loss is recognized in other operating income, or the investment is determined to be impaired, when the cumulative loss is reclassified from the fair value through other comprehesive income reserve to income statement in impairment loss on financial instruments. Interest earned whilst holding Fair value through other comprehesive income financial investments is reported as interest and similar income using the EIR method. Quoted equity securities whose fair value can be reliably measured are carried at quated price where as Unquoted equity securities whose fair value cannot be reliably measured are carried using proper valuation model.

The Company evaluates whether the ability and intention to sell its AFS financial assets in the near term is still appropriate. When the Company is unable to trade these financial assets due to inactive markets, the Company may elect to reclassify these financial assets held to maturity if the Management has the ability and intention to hold the assets for

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

'Day 1' profit or loss

When the transaction price differs from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable markets, the Company immediately recognizes the difference between the transaction price and fair value (a 'Day 1' profit or loss) in 'Other operating income'.

In cases where fair value is determined using data which is not observable, the difference between the transaction price and model value is only recognized in the profit or loss when the inputs become observable, or when the instrument is derecognized.

Reclassification of financial assets

Reclassification is at the election of Management, and is determined on an instrument by instrument basis. The Company does not reclassify any financial instrument into the fair value through profit or loss category after initial recognition.

For a financial asset reclassified out of the AFS category, any previous gain or loss on that asset that has been recognized in equity is amortized to income statement over the remaining life of the investment using the EIR. Any difference between the new amortized cost and the expected cash flows is also amortized over the remaining life of the asset using the EIR. If the asset is subsequently determined to be impaired then the amount recorded in equity is reclassified to income statement.

The Company may reclassify a non–derivative trading asset out of the 'held–for–trading' category and into the 'loans and receivables' category if it meets the definition of loans and receivables and the Company has the intention and ability to hold the financial asset for the foreseeable future or until maturity.

If a financial asset is reclassified, and if the Company subsequently increases its estimates of future cash receipts as a result of increased recoverability of those cash receipts, the effect of that increase is recognized as an adjustment to the EIR from date of change in estimate.

Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's statement of financial position) when:

- the rights to receive cash flows from the asset have expired, or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass–through' arrangement; and either

(a) the Company has transferred substantially all the risks and rewards of the asset, or
(b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event'), has an impact on the estimated future cash flows of the financial asset or the Company of financial assets that can be reliably estimated.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

(i) Financial assets carried at amortised cost

For financial assets carried at amortised cost (such as loans and receivables), the Company first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in income statement. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

The interest income is recorded as part of 'Interest and similar income'. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write–off is later recovered, the recovery is credited to the 'loan impairment charge'.

The present value of the estimated future cash flows is discounted at the financial asset's original EIR. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current EIR.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purpose of collective evaluation of impairment, financial assets are grouped on the basis of the Company's internal credit grading system, that considers credit risk characteristics such as asset type, industry, geographical location, collateral type, past–due status and other relevant factors.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the Company.

Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the Company and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

(ii) financial assets at fair value through other comprehesive

financial assets at fair value through other comprehesive income are impaired if there is objective evidence of impairment, resulting from one or more loss events that occurred after initial recognition but before the reporting date, that have an impact on the future cash flows of the asset. In addition, an available-for-sale equity instrument is generally considered impaired if a significant or prolonged decline in the fair value of the instrument below its cost has occurred. Where an available-for-sale asset, which has been remeasured to fair value directly through equity, is impaired, the impairment loss is recognised in profit or loss. If any loss on the financial asset was previously recognised directly in equity as a reduction in fair value, the cumulative net loss that had been recognised in equity is transferred to profit or loss and is recognised as part of the impairment loss. The amount of the loss recognised in profit or loss is the difference between the acquisition cost and the current fair value, less any previously recognised impairment loss.

If, in a subsequent period, the amount relating to an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, where the instrument is a debt instrument, the impairment loss is reversed through profit or loss. An impairment loss in respect of an equity instrument classified as available-for-sale is not reversed through profit or loss but accounted for directly in equity.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.5.2 Financial liabilities

Initial recognition and measurement

All financial liabilities of the Company are classified as other financial liabilities at amortised cost.

They are recognised initially at fair value, net of directly attributable transaction costs and include insurance payables, dividend payables and other account payables.

Subsequent measurement

After initial measurement, the Company's financial liabilities are subsequently measured at amortised cost using the Effective Interest Rate (EIR). Amortised cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the EIR.

Derecognition of financial liabilities

Financial liabilities are derecognised when they have been redeemed or otherwise extinguished.

2.5.3 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position where the Company has a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legal enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in event of default, insolvency or bankruptcy of the company or the counterparty.

2.6 Reinsurance assets

The Company cedes business to reinsurers in the normal course of business for the purpose of limiting its net loss potential through the transfer of risks as described in note 2.15. Premium ceded comprise gross written premiums. Reinsurance arrangements do not relieve the Company from its direct obligations to its policy holders.

Reinsurance assets are recognized when the related gross insurance claim is recognized according to the terms of the relevant contract. The Company has the right to setoff reinsurance payables against amounts due from reinsurers in line with the agreed arrangements between both parties.

2.7 Other assets

These are other receivables and prepayments. Other receivables are stated after deductions of amount considered bad or doubtful of recovery. These are loans and receivables other than investment securities, insurance trade receivables and reinsurance assets. When a debt is deemed not collectible, it is written-off against the related provision or directly to profit or loss account to the extent not previously provided for. Any subsequent recovery of written-off debts is credited to profit or loss.

The Company's other receivables are rent receivables, staff debtors and other account receivables.

Prepayments are payments made in advance for services to be enjoyed in future. The amount is initially capitalized in the reporting period in which the payment is made and subsequently amortised over the period in which the service is to be enjoyed. They include prepaid rent, prepaid staff expenses and other prepaid office expenses.

2.08 Leases

The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or whether the arrangement conveys a right to use of asset.

Company as a lessee

Leases that do not transfer to the Company substantially all of the risks and benefits incidental to ownership of the leased items are right of use assets. Payments for right of use assets are recognised as an expense in the income statement on a straight-line basis over the lease term. Contingent rental payable is recognised as an expense in the period in which it is incurred.

Company as a lessor

Leases where the Company does not transfer substantially all of the risk and benefits of ownership of the asset are classified as operating leases. Rental income is recorded as earned based on the contractual terms of the lease in Other operating income. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.09 Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the property, plant and equipment if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the Company recognises such parts as individual assets with specific useful lives and depreciates them accordingly. All other repair and maintenance costs are recognised in income statement as incurred.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

Depreciation is calculated using the straight-line method to allocate their cost less their residual values over their estimated useful lives, as follows:

Asset class	Depreciation (in years)	Residual value (%)
Buildings	50	5%
Lift	15	1%
Motor vehicles	10	5%
Furniture & fittings	10	1%
Computer equipment	7	1%
Office equipment	7	1%

The Company commences depreciation when the asset is available for use.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in income statement when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

2.10 Investment property

Properties that are held for rent by the Company to earn rental income or for capital appreciation, or both, and are not occupied by the Company, are classified as investment properties.

Recognition of investment properties takes place only when it is probable that the future economic benefits that are associated with the investment property will flow to the Company and the cost can be reliably measured. This is usually when all risks are transferred.

Investment properties are measured initially at cost, including transaction costs. The Company has opted to subsequently carry investment property at cost and disclose fair value. Fair value of investment property is the price that would be received from sale of the asset in an orderly transaction, without deduction of any transaction costs. Fair value of the Company's investment property is determined by the independent valuers who have recent experience in the location and category of the investment property being valued.

The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in the light of current market conditions.

Earned rental income is recorded in profit or loss for the year within (other operating income). Gains and losses resulting from changes in the fair value of investment property are recorded in profit or loss for the year and presented separately.

Investment properties are derecognised when they are disposed of.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.11 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in income statement in the period in which the expenditure is incurred .

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortisation period or methodology, as appropriate, which are then treated as changes in accounting estimates. The amortisation expenses on intangible assets with finite lives is presented in income statement.

Amortisation is calculated using the straight–line method to write down the cost of intangible assets to their residual values over their estimated useful lives, as follow:

Intangible assets class	Useful lives (years)
Computer software	8

2.12 Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the income statement.

2.13 Statutory deposits

Statutory deposits are cash balances held with the National Bank of Ethiopia in line with Article 20 of Insurance Business Proclamation No. 746/2012 as amended by the Insurance Business(Amendment) Proclamation No.1163/2019 and may not be withdrawn except with the written permission of the National Bank of Ethiopia, or be used as a pledge or security for any loan. They have been separately disclosed due to their nature and liquidity. Statutory deposits are measured at cost.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.14 Insurance contracts

Classification

The Company enters into insurance contracts as its primary business activity. Insurance contracts are those that the Company accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder or other beneficiary, if a specified uncertain future event (the insured event) adversely affects the policyholder or the other beneficiary.

The Company's insurance contracts are classified into two main categories, depending on the duration of risk.

(i) Non- life insurance contracts

These contracts are accidents and casualty and property insurance contracts.

Accidents and casualty insurance contracts protect the Company's customers against the risk of causing harm to third parties as a result of their legitimate activities. Damages covered include both contractual and non-contractual events. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public liability).

Property insurance contracts mainly compensate the Company's customers for damage suffered to their properties or for the value of property lost. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities.

(ii) Life insurance contracts

These contracts insure events associated with human life (for example, death or survival) over a long duration.

In addition, the Company has short-term life insurance contracts which protect the Company's policyholders from the consequences of events (such as death or disability) that would affect the ability of the insured or his/ her dependants to maintain their current level of income. Guaranteed benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the insured or the beneficiary. In such cases,there are no maturity or surrender benefits.

(iii) Takaful

The Company has obtained authorization from National Bank of Ethiopia to provide takaful window operation by adopting wakala operating model. With this operating model, the Company is acting as trustee on behalf of the participants to manage the operation of the Takaful business. The Company issues general takaful contracts on behalf of participants. Takaful contracts are issued based on risk sharing arrangement between participants. Contribution of participants are credited to the participants' takaful fund. Takaful fund can be invested in Shariah compliant areas and as approved by the Shariah Advisory Council.

Liability adequacy test

At each end of the reporting period, liability adequacy tests are performed to ensure the adequacy of the contract liabilities net of related DAC. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss initially by writing off DAC and by subsequently establishing a provision for losses arising from liability adequacy tests (the unexpired risk provision).

As set out under note 4.2, life insurance contracts are measured based on assumptions set out at the inception of the contract. When the liability adequacy test requires the adoption of new best estimate assumptions, such assumptions (without margins for adverse deviation) are used for the subsequent measurement of these liabilities. Any DAC written off as a result of this test cannot subsequently be reinstated.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Reinsurance contracts held

Contracts entered into by the Company with reinsurers under which the Company is compensated for losses on one or more contracts issued by the Company and that meet the classification requirements for insurance contracts in Note 2.15 are classified as reinsurance contracts held. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Company under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts.

The benefits to which the Company is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers, as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due. The Company had the right to set-off reinsurance payables against the amount due from reinsurance in line with the agreed arrangement between both parties.

In certain cases, a reinsurance contract is entered into retrospectively to reinsure a notified claim under the Company's property or accident and casualty insurance contracts. Where the premium due to the reinsurer differs from the liability established by the Company for the related claim, the difference is amortised over the estimated remaining settlement period.

The Company assesses its reinsurance assets for impairment on an annual basis. If there is objective evidence that the reinsurance asset is impaired, the Company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognizes that impairment loss in the income statement. The Company gathers the objective evidence that a reinsurance asset is impaired using the same process adopted for financial assets held at amortized cost. The impairment loss is calculated following the same method used for these financial assets. These processes are described in Note 2.5.

Retakaful

The Company as the operator of the participants' fund cedes underwriting risk in the normal course of takaful business. Retakaful certificates assets represent balances due from retakaful operators. Retakaful certificates liabilities represent balances due to retakaful operators. Contributions and claims are presented on a gross basis. Retakaful certificates assets are reviewed for impairment at each financial year end.

Deferred income

Deferred income represents a portion of commission received on reinsurance contracts which are booked during the financial year and are deferred to the extent that they are recoverable out of future revenue margins. It is calculated by applying the reinsurance commission income to the ratio of prepaid reinsurance to reinsurance cost.

Receivables and payables related to insurance contracts

Receivables and payables are recognized when due and measured on initial recognition at the fair value. Subsequent to initial recognition, insurance receivables and payables are measured at amortized cost, using the effective interest rate method as described in note 2.5 and 2.17. These include amounts due to and from agents, brokers and insurance contract holders. If there is objective evidence that the insurance receivable is impaired, the Company reduces the carrying amount of the insurance receivable accordingly and recognizes that impairment loss in the income statement. The Company gathers the objective evidence that an insurance receivable is impaired using the same process adopted for loans and receivables.

The impairment loss is calculated under the same method used for these financial assets. These processes are described in Note 2.5.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Salvage and subrogation reimbursements

Some insurance contracts permit the Company to sell (usually damaged) property acquired in settling a claim (for example, salvage). The Company may also have the right to pursue third parties for payment of some or all costs (for example, subrogation). Estimates of salvage recoveries are included as an allowance in the measurement of the insurance claims paid, and salvage property is recognized in recovery properties held for sale. The allowance is the amount that can reasonably be recovered from the disposal of the property.

Subrogation reimbursements are also considered as an allowance in the measurement of the insurance claims paid and are recognized in other assets. The allowance is the assessment of the amount that can be recovered from the action against the liable third party.

2.15 Insurance contracts liabilities

The recognition and measurement of insurance contracts have been set out under Note 2.15. Insurance contract liabilities arising from insurance contracts are determined as follows:

(i) Non-life insurance contracts

(a) Reserves for outstanding claims

The reserve for outstanding claims is maintained at the total amount of outstanding claims incurred and reported plus claims incurred but not reported ("IBNR") as at the balance sheet date. The IBNR is based on the liability adequacy test described in note 2.15.

(b) Reserves for unearned premium and unexpired risk

The reserve for unearned premium is calculated on a time apportionment basis in respect of risk accepted during the year. A provision for additional unexpired risk reserve is recognised for an underwriting year where it is envisaged that the estimated cost of claims and expenses would exceed the unearned premium reserve.

At the end of each reporting period, proportions of net retained premium of the general insurance are provided to cover portions of risks which have not expired. The reserves are calculated on 1/24th method as prescribed by the Directive of the National Bank of Ethiopia.

(c) Reserving methodology

Data segmentation: The data used for reserving is segmented into the following classes as per the NBE Direcetives:
- Motor vehicle insurance business;
- Fire insurance business;
- Personal accident insurance business;
- Marine insurance business;
- Workmens' compensation insurance business;
- Engineering;
- Goods in transits;
- Public liability, pecuniary, Political Violence and Terrorism(PVT) and other miscellaneous insurances.

(ii) Life insurance contracts

This is made up of net liabilities on policies in force as determined by qualified actuaries at the reporting date. Surplus or deficit arising from the periodic valuation of the life insurance contracts are recognised in the statement of profit and loss.

The reserves include Incurred But Not Reported (IBNR) and Unearned Premium Reserve (UPR).

Reserving methodology

Data segmentation: The data used for reserving is segmented into two classes as follows:
- Individual business; and
- Group business.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

(iii) Takaful Contracts

The Company is not the one assuming the risk. Rather it is the various participants who are mutually covering each other. All contributions (premiums) paid by the participants will be accumulated in the Takaful Fund. All payment of the Takaful benefits (i.e. claims) will be paid by the Takaful Fund. On the other hand the takaful operator guarantees the takaful fund's operations through the requirement to provide qard in times of deficit.The purpose of this 'financial assistance' is to maintain the sustainability of the fund.

The takaful operator also provide a common platform for managing the operations such as the same accounting software for the use of both the operator and the fund. Thus, the takaful operator is responsible for day to day activities such the allocation of resources, supplies and other services. the takaful operator appears to have power over the takaful funds. Underwriting and investment management, an operator would also undertake claims processing, loss adjusting, marketing, and appointment of agents

2.16 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in income statement net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as other operating expenses.

2.17 Insurance payables

Insurance payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. The fair value of a non-interest bearing liability is its discounted repayment amount. If the due date is less than one year, discounting is omitted as the impact is not expected to be significant.

2.18 Other payables

Other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. The fair value of a non-interest bearing liability is its discounted repayment amount. If the due date is less than one year, discounting is omitted as the impact is not expected to be significant.

2.19 General takaful fund

The general takaful fund consists of reserves and any surplus/deficit arising form contribution and investment income after deducting retakaful, wakalah fee , claims incurred, other operating expenses, taxation and administration charges during the year. Where the general takaful fund becomes a deficit it will be financed by the shareholders contribution in the form of loan or Qard al hasan. Surplus is distributable to participants in accordance with the terms and conditions prescribed by the Shariah Advisory Council of the Company

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.20 Share capital

The Company classifies ordinary shares as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of new shares are recognized as deductions from equity, net of tax, from the proceeds. The excess of the issue price over the par value is recorded in the share premium reserve.

2.21 Retained earnings

The net profits or losses from operations in current and prior periods are accumulated in retained earnings less distributions to equity holders.

2.22 Legal reserves

In accordance with Article 22 sub articles (1) and (2),of Insurance Business Proclamation No 746/2012, the Company, at the end of each financial year, transfers to its legal reserve to account a sum of not less than 10% of profit. When the legal reserve becomes equal to the paid-up capital of the Company, the amount of the legal reserve to be retained by the Company each year from its net profit shall be determined by NBE's directive.

2.23 Dividend

Dividends are recorded in equity in the period in which they are declared. Any dividends declared after the end of the reporting period and before the financial statements are authorised for issue, are disclosed in the subsequent events note. The statutory accounting reports of the Company are the basis for profit distribution and other appropriations.

2.24 Revenue recognition

Gross premiums

Gross recurring premiums on life and investment contracts with DPF are recognised as revenue when payable by the policyholder. For single premium business, revenue is recognised on the date on which the policy is effective. Gross general insurance written premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the reporting period. They are recognised on the date on which the policy commences. Premiums include any adjustments arising in the reporting period for premiums receivable in respect of business written in prior accounting periods. Rebates that form part of the premium rate, such as no claim rebates, are deducted from the gross premium; others are recognised as an expense.
Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned premiums are calculated on a daily pro rata basis. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums and it's computed based on the 1/24th method as prescribed in the Directives of the National Bank of Ethiopia.

Reinsurance premiums

Gross outward reinsurance premiums on life and investment contracts are recognised as an expense on the earlier of the date when premiums are payable or when the policy becomes effective.

Gross general reinsurance premiums ceded comprise the total premiums payable for the whole cover provided by contracts entered into in the period and are recognised on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods.

Unearned reinsurance premiums are those proportions of premiums ceded in a year that relate to periods of risk after the reporting date. Unearned reinsurance premiums are deferred over the term of the underlying direct insurance policies for risks-attaching contracts and over the term of the reinsurance contract for losses- occurring contracts.

Reinsurance premiums and claims on the face of the statement of profit or loss have been presented as negative items within premiums and net benefits and claims, respectively, because this is consistent with how the business is managed.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Fees and commission income

Insurance and investment contract policyholders are charged for policy administration services, investment management services, surrenders and other contract fees. These fees are recognised as revenue over the period in which the related services are performed. If the fees are for services provided in future periods, then they are deferred and recognised over those future periods.

Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Fees and commissions that are an integral part of the effective yield of the financial asset are recognised as an adjustment to the EIR of the instrument.

Investment income also includes dividends when the right to receive payment is established.

Dividend income

This is recognised when the Company's right to receive the payment is established, which is generally when the shareholders approve and declare the dividend.

2.25 Gross benefits and claims

Gross benefits and claims for life insurance contracts and for investment contracts with DPF include the cost of all claims arising during the year, including internal and external claims handling costs that are directly related to the processing and settlement of claims and policyholder bonuses declared on DPF contracts. Changes in the gross valuation of insurance and investment contract liabilities with DPF are also included. Death claims and surrenders are recorded on the basis of notifications received. Maturities and annuity payments are recorded when due.

General insurance and health claims include all claims occurring during the year, whether reported or not, related internal and external claims handling costs that are directly related to the processing and settlement of claims, a reduction for the value of salvage and other recoveries, and any adjustments to claims outstanding from previous years.

2.26 Claims recovered from reinsurers

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract.

2.27 Finance cost

Interest paid is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Accrued interest is included within the carrying value of the interest bearing financial liability.

2.28 Underwrting expenses

Underwriting expenses are made up of acquisition and maintenance expenses comprising commission and policy expenses and other direct costs.

Underwriting expenses for insurance contracts are recognized as expense when incurred, with the exception of acquisition costs which are recognized on a time apportionment basis in respect of risk.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.29 Employee benefits

(a) ***Wages, salaries and annual leave***

Wages, salaries, bonuses, other contributions, paid annual leave and sick leave are accrued in the year in which the associated services are rendered by employees of the Company.

(b) ***Defined contribution plan***

The Company operates two defined contribution plans;

i) pension scheme in line with the provisions of Private Organisation Employees Pension Proclamation No. 715/2011. Funding under the scheme is 7% and 11% by employees and the Company respectively;

ii) provident fund contribution, funding under this scheme is 8% and 15% by employees and the Company respectively based on the employees' salary.

Once the contributions have been paid, the Company retains no legal or constructive obligation to pay further contributions if the Fund does not hold enough assets to finance benefits accruing under the retirement benefit plan. The Company's obligations are recognized in the profit and loss account.

(c) ***Defined benefit obligations***

The Company operates a defined benefit severance scheme in Ethiopia, where members of staff who have spent 5 years or more in service of the Company are entitled to benefit payments upon retirement. The benefit payments are based on final emolument of staff and length of service. A defined benefit plan is a pension plan that is not a defined contribution plan. Typically defined benefit plans define an amount of gratuity benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognised in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the market rates on government bonds that have terms to maturity approximating to the terms of the related pension obligation.

Company's contributions to this scheme are charged to profit or loss in the year in which they relate.

Remeasurement gain and loss arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

Current service and interest cost are included as part of employee benefit expense in the profit or loss.

Past-service costs are recognised immediately in profit or loss.

Gains or losses on curtailment or settlement are recognised in profit or loss when the curtailment or settlement occurs.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.30 Fair value measurement

The Company measures financial instruments classified as available-for-sale at fair value at each statement of financial position date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are, summarised in the following notes:

- Disclosures for valuation methods, significant estimates and assumptions Note 4.7.1 and Notes 3
- Quantitative disclosures of fair value measurement hierarchy Note 4.7.2
- Financial instruments (including those carried at amortised cost) Note 4.7.3

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company's Management determines the policies and procedures for both recurring fair value measurement, such as available-for-sale financial assets.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

2.31 Earnings per share

The Company presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS are calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and weighted average number of ordinary shares outstanding for the efforts of all diluted potential ordinary shares.

2.32 Income taxation

(a) Current income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in Ethiopia. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(b) Deferred tax

Deferred tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

3 Significant accounting judgments, estimates and assumptions

The preparation of the Company's financial statements requires Management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Company's exposure to risks and uncertainties include:

- Capital management Note 4.7
- Financial risk management and policies Note 4
- Sensitivity analyses disclosures Note 4.5.2

3.1 Judgments

In the process of applying the Company's accounting policies, Management has made the following judgments, which have the most significant effect on the amounts recognised in the financial statements:

Right of use asset

The Company leases land for its office buildings and investment properties and rents office buildings. Land leases are made for fixed period of 36-60 years. Office rents are made for fixed period of 1-5 years and in most cases they are renewable. All Company's right of use asset are supported by lease agreements. The lease amounts of these agreements are fully settled except one new land lease agreement which is partially paid. The land lease liability for partial payment is easured at amortized cost using the interest rate specified on lease agreement. The right-of-use assets are depreciated on a straight-line basis over the lease period. For all other leases, the right of use asset were measured as equal to the lease liability and adjusted for any accruals or prepayments on the balance sheet. The Company uses discount rate which is embeded under the contract where it is specified.

Measurment of Insurance contracts

Tthe Company's insurance contracts issued and reinsurance contracts are measured by applying the Premium Allocation Approach (PAA) where applicable under IFRS17. For contracts measured under the PAA, the Company amortizes insurance acquisition cashflows on a straight-line basis over the coverage period of the group of contracts.

3.2 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(a) Valuation of insurance contract liabilities

Life insurance contract liabilities

The liability for life insurance contracts is either based on current assumptions or on assumptions established at the inception of the contract, reflecting the best estimate at the time together with a margin for risk and adverse deviation. All contracts are subject to a liability adequacy test which reflects Management's best current estimate of future cash flows.

These liabilities are estimated using appropriate and acceptable base tables of standard mortality according to the type of contract being written. Management makes various assumptions such as expenses inflation and mortality in estimating the required liabilities for life contracts.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Non-life insurance contract liabilities

For non-life insurance contracts, estimates have to be made both for the expected ultimate cost of claims reported at the reporting date and for the expected ultimate cost of claims incurred, but not yet reported, at the reporting date (IBNR). It can take a significant period of time before the ultimate claims cost can be established with certainty and for some type of policies, IBNR claims form the majority of the liability in the statement of financial position.

The ultimate cost of outstanding claims is estimated by using a standard actuarial claims projection techniques: Chain Ladder.

The main assumption underlying this technique is that a Company's past claims development experience can be used to project future claims development and, hence, the ultimate claims costs. As such, the method extrapolates the development of paid and incurred losses, average costs per claim and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by significant business lines and claim types. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based.

Similar judgments, estimates and assumptions are employed in the assessment of adequacy of provisions for unearned premium.

(b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the discounted cash flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See Note 4.7.2 for further disclosures.

(c) Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant Management's judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

(d) Impairment of insurance receivables

The Company assesses at the end of every reporting period whether there is any objective evidence that its premium receivable is impaired. The Company determines whether impairment losses are incurred if and only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the receivable (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the receivable that can be reliably estimated, or a trigger event is identified.

The following impairment triggers have been set by the Company:
(a) significant financial difficulty of the premium debtor;
(b) significant financial difficulty of the reinsurance broker;
(c) a breach of agreements, such as payment defaults or delinquency in premium payments;
(d) Economic, regulatory or legal reasons relating to the premium debtor's financial difficulty, granting to the premium debtor a concession that the Company would not otherwise consider;
(e) High probability that the premium debtor will enter bankruptcy or other financial reorganization.

If any of the impairment triggers are identified, the Company specifically assesses the receivables for impairment. Where no impairment trigger is identified, or no objective evidence of impairment exists, the Company assesses its receivables collectively for impairment using the historical loss rate model.

The historical loss rate model considers the historical recoveries (cash flows) on premium debts for policies written in prior years, in order to determine the loss given default ratio on outstanding premium as at the reporting date. The model also considers premium receipts subsequent to the reporting date. The loss ratio derived is used to determine the allowance for impairment on premium debts.

This model assumes that all premium debts will be paid until evidence to the contrary (a loss or trigger event) is identified. On the identification of an objective evidence of impairment, the premium debts are subject to specific impairment. Where there is no objective evidence of impairment, the premium debts are subjected to collective impairment.

Collective impairment incorporates the following:
• current and reliable data, Management's experience on credit judgments, and all known relevant internal and external factors that may affect collectability;

• historical loss experience or where institutions have no loss experience of their own or insufficient experience, peer company experience for a comparable company's of financial instruments at amortized cost;

• adjustments to historical loss experiences on the basis of current observable data to reflect the effects of current conditions.

(e) Liabilities arising from insurance contracts

Liabilities for unpaid claims are estimated on case by case basis. The reserves made for claims fluctuate are based on the nature and severity of the claim reported. Claims incurred but not reported are determined using statistical analyses and the Company deems the reserves as adequate.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

(f) Retirement benefit obligations

The present value of the retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of severance pay obligations. The assumptions used in determining the net cost (income) include the discount rate, rate of return on assets, future salary increments and mortality rates.

The Company determines the appropriate discount rate at the end of the year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the gratuity obligations. In determining the appropriate discount rate, the Company considers the interest rates of high-quality government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related liability. Other key assumptions for retirement benefit obligations are based in part on current market conditions.

(g) Depreciation and carrying value of property, plant and equipment

The estimation of the useful lives of assets is based on Management's judgment.

The Company estimates the useful lives of property, plant and equipment based on the period over which the assets are expected to be available for use. Property, plant and equipment is depreciated over its useful life.

Estimates could change if expectations differ due to physical wear and tear and technical or commercial obsolescence. It is possible, however, that future results of operations could be materially affected by changes in the estimates brought about by changes in factors mentioned above. The amounts and timing of expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of the property, plant and equipment would increase expenses and decrease the carrying value of non-current assets.

(h) Impairment of non- financial assets

The Company reviews other non-financial assets for possible impairment if there are events or changes in circumstances that indicate that the carrying values of the assets may not be recoverable, or at least at every reporting date, when there is any indication that the asset might be impaired. The Company is of the opinion that there is no impairment indicator on its non- financial assets as at the reporting date.

(i) Fair valuation of investment properties

The fair value of investment properties is based on the nature, location and condition of the specific asset. The fair value is determined by reference to observable market prices. The fair value of investment property does not reflect the related future benefits from this future expenditure. These valuations are performed by external appraisers. Assumptions are made about expected future cash flows and the discounting rates.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

4 Insurance and financial risk management

4.1 Introduction

Risk is inherent in the the Company's activities, but is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Company's continuing profitability and each individual within the Company is accountable for the risk exposures relating to his or her responsibilities. The Company is exposed to operational and financial (credit, liquidity and market) risk.

The independent risk control process does not include business risks such as changes in the environment, technology and industry. The Company's policy is to monitor those business risks through the the Company's strategic planning process.

4.1.1 Risk management structure

The Board monitors the overall risk encountered by the Company. The Board is responsible to develop comprehensives risk management program and policies of the Company. The Board has an oversight role on the proper implementation of the Company's risk management program or policies. The Board monitors proper implementation of policies through various reports.

The Management has the overall responsibility for the proper execution and interpretation of the risk strategy and implementing principles, frameworks, policies and limits. It is also responsible for managing risk decisions and monitoring risk levels and submit reports to the Board regarding risk management issues and give timely directions.

The Company's Risk Management Unit is responsible for implementing and maintaining risk related procedures, for assessesing and monitoring the level of risk assumed by the Company. Besides, the Risk Management Unit is responsible for monitoring compliance with risk principles, policies and limits across the Company. It carries out an assessment of risk on periodic basis to monitor the Company's overall risk, including monitoring the risk of exposures against limits and the assessment of risks of new products and structured transactions. Exceptions are reported, where necessary, to the Board's Risk and Compliance Committee and the relevant actions are taken to address exceptions and any areas of weakness. The unit works closely with the Management to ensure that procedures are compliant with the overall framework. The unit is functionally responsible to the Board. The risk Management unit has also closer relationship with internal audit function. Internal audit function among others ensures the effectiveness of the risk management function periodically. Internal audit function discusses the results of its assessments with Management, and reports its findings and recommendations to the Board Audit Committee.

The Company's Finance and Accounts Directorate is responsible for managing the financial assets, financial liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Company.

4.1.2 Risk measurement and reporting systems

The Company's risks are measured using a method that reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical model. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment.

Monitoring and controlling risks is primarily performed based on limits established by the Company. These limits reflect the business strategy and market environment of the Company as well as the level of risk that the Company is willing to accept, with ad emphasis on selected segments. In addition, the Company measures and monitor the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activity.

4.1.3 Risk mitigation

The Company uses various risk mitigating techniques to reduce its risk to the acceptable level. Risk controls and mitigants, identified and approved for the Company, are documented for existing and new processes and systems.

Risk control processes are identified and discussed in the quarterly risk report and Management Risk Committee meetings. Control processes are also regularly reviewed at Business Unit level and changes agreed with the Board.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

4.2 Insurance risk

The principal risk the Company faces under insurance contracts is that the actual claims and benefit payments or the timing ther differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long–term claims. Therefore, the objective of the Company is to ensure that sufficient reserves are available to co these liabilities.

The risk exposure is mitigated by diversification across a large portfolio of insurance contracts. The variability of risks is also imp by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements. The Company purchases reinsurance as part of its risks mitigation programme.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in acc with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations tc policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet obligations assumed under such reinsurance agreements. The Company's placement of reinsurance is diversified such that it is n dependent on a single reinsurer nor are the operations of the Company substantially dependent upon any single reinsurance con

Life insurance contracts

Life insurance contracts offered by the Company include: Individual Life, Individual riders, group term, group medical, group ric endowment assurance, education endowments and individual mortgage protection.

The main risks that the Company is exposed to are as follows:

- Mortality risk – risk of loss arising due to policyholder death experience being different than expected
- Morbidity risk – risk of loss arising due to policyholder health experience being different than expected
- Longevity risk – risk of loss arising due to the annuitant living longer than expected
- Investment return risk – risk of loss arising from actual returns being different than expected
- Expense risk – risk of loss arising from expense experience being different than expected
- Policyholder decision risk – risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected.

These risks do not vary significantly in relation to the location of the risk insured by the Company and type of risk insured.

The Company's underwriting strategy is designed to ensure that risks are well diversified in terms of type of risk and level of insu benefits. This is largely achieved through the use of medical screening in order to ensure that pricing takes account of current hea conditions and family medical history, regular review of actual claims experience and product pricing as well as detailed claims' handling procedures.

Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Company has the right not to rene individual policies. Insurance contracts also entitle the Company to pursue third parties for payment of some or all costs.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Key assumptions

The key assumptions to which the estimation of liabilities is particularly sensitive are as follows:

► Expenses

Operating expenses assumptions reflect the projected costs of maintaining and servicing in–force policies and associated overhea expenses. The current level of expenses is taken as an appropriate expense base, adjusted for expected expense inflation if appro

An increase in the level of expenses would result in an increase in expenditure, thereby reducing profits for the shareholders.

► Policyholder decision (lapses and surrender)

Policy termination assumptions are determined using statistical measures based on the Company"s experience and vary by prod type.

An increase in lapse rates early in the life of the policy would tend to reduce profits for shareholders to the unrecouped initial exp

► Discount rate

Life insurance liabilities are determined as the sum of the discounted value of the expected benefits and future administration ex directly related to the contract, less the discounted value of the expected theoretical premiums that would be required to meet th future cash outflows. Discount rates are based on current industry risk rates, adjusted for the Company's own risk exposure.

A decrease in the discount rate will increase the value of the insurance liability and therefore reduce profits for the shareholders.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

4.3 Financial risk

Financial instruments by category

The Company's financial assets are classified into the following measurement categories: available-for-sale and loans and receivables and the financial liabilities are classified into other liabilities at amortised cost.

Financial instruments are classified in the statement of financial position in accordance with their legal form and substance.

The Company's classification of its financial assets is summarised in the Table below:

30 June 2026	Notes	Available-For-Sale Birr'000	Loans and receivables Birr'000	Total Birr'000
Cash and cash equivalents		-	3,956,721	3,956,721
Investment securities:	13			
– Fair value through other comprehesive income	14	6,969,406	-	6,969,406
– Debt instruments at amortised cost	14	-	566,677	566,677
Insurance receivables	15	-	9,700	9,700
Reinsurance assets	16	-	3,109,067	3,109,067
Other assets	17	-	1,189,551	1,189,551
Total financial assets		6,969,406	8,831,716	15,801,122

30 June 2025	Notes	Available-For-Sale Birr'000	Loans and receivables Birr'000	Total Birr'000
Cash and cash equivalents		-	3,932,603	3,932,603
Investment securities:	16			
– Fair value through other comprehesive income	17	2,731,505	-	2,731,505
– Debt instruments at amortised cost	17	-	441,272	441,272
Insurance receivables	18	20,830		20,830
Reinsurance assets	19	-	1,397,838	1,397,838
Other assets	20	-	347,146	347,146
Total financial assets		2,752,335	6,118,859	8,871,194

4.4 Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's investment portfolio, long term staff loans and the reliance on reinsurers to make payment when certain loss conditions are met.

For risk management reporting purposes, the Company considers and consolidates all elements of credit risk exposure.

The following policies and procedures are in place to mitigate the Company's exposure to credit risk:

a) The Company's risk management policy sets out the assessment and determination of what constitutes credit risk for the Company. Compliance with the policy is monitored, exposures and breaches are reported to the Company's Management risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.

b) Net exposure limits are set for each counterparty or company of counterparties and industry segment (i.e. limits are set for investments and cash deposits).

c) The Company further restricts its credit risk exposure by entering into master netting arrangements with counterparties with which it enters into significant volumes of transactions. However, such arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with such balances is reduced in the event of a default, when such balances are settled on a net basis. The Company's reinsurance treaty contracts involve netting arrangements.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

d) Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by following policy guidelines in respect of counterparties' limits that are set each year by the Management and are subject to regular reviews. At each reporting date, Management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment.

The Table below shows the maximum exposure to credit risk for the Company's financial assets. The maximum exposure is shown gross, before the effect of mitigation:

	As at '30 June 2026 Birr'000	As at '30 June 2025 Birr'000
Cash and cash equivalents	3,956,721	2,883,300
Investment securities:		
– Fair value through other comprehesive	6,969,406	1,710,345
– Debt instruments at amortised cost	566,677	244,227
Insurance receivables	-	2,950
Reinsurance assets	3,109,067	1,361,024
Other assets	1,189,551	182,054
	15,791,422	6,383,900

4.4.1 Credit quality analysis

(a) Cash and cash equivalents

The credit quality of cash and bank balances and short-term investments are neither past due nor impaired as at 30 June 2026, and are non-rated as they are held in Ethiopian banks. There are no credit rating agencies in Ethiopia. The Company has no cash and cash equivalents that are held in foreign banks.

(b) Investment securities

The Company's investment portfolio is exposed to credit risk through its fixed income and money market instruments. The Company further manages its exposure to credit risk through counterparty risk via established limits as approved by the Directive issued by NBE. All fixed income investments are measured for performance on a quarterly basis and monitored by Management. The credit risk exposure associated with money market investments is low.

(c) Credit quality of reinsurers assets

Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by following policy guidelines in respect of counterparties' limits that are set each year by the Board of Directors and are subject to regular reviews. At each reporting date, Management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment. Reinsurance treaties are reviewed annually by Management prior to renewal of the reinsurance contract.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Insurance receivables - neither past due nor impaired

The credit quality of the portfolio of insurance receivables that were neither past due nor impaired can be assessed by reference to the customer's ability to pay based on loss experience. Insurance receivables in this category are receivables from contract holders (government organs) that are past due for less than 30 (thirty) days.

Insurance receivables that have been classified as neither past due nor impaired are assessed on a collective basis.

Other loans and receivables

Other receivables balances constitute, rent receivables, other account receivables and staff debtors. The Company has an internal system of assessing the credit quality of other receivables through established policies and approval systems. The Company constantly monitors its exposure to these receivables via periodic performance review. The Company further manages its exposure to credit risk through deduction of transactions at source. The exposure to credit risk associated with other receivables

4.4.2 *Allowance for impairment*

The Company establishes an allowance for impairment losses that represents its estimate of incurred losses in its loan portfolio. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loan loss allowance, established for companies of homogeneous assets in respect of losses that have been incurred but have not been identified on receivables subject to individual assessment for impairment.

	'As at '30 June 2026 Birr'000	'As at '30 June 2025 Birr'000
Due from contract holders	22,453	22,453
Other loans and receivables	7,891	8,002
Total allowance for impairment	30,344	30,455

4.5 Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its maturing obligations when they become due, at reasonable cost and in a timely manner. Liquidity risk arises because of the possibility that the Company might be unable to meet its payment obligations when they fall due as a result of mismatches in the timing of the cash flows under both normal and stress circumstances. Such scenarios could occur when funding needed for illiquid asset positions is not available to the Company on acceptable terms.

Liquidity risk management in the Company is solely determined by Management, which bears the overall responsibility for liquidity risk. The main objective of the Company's liquidity risk framework is to maintain sufficient liquidity in order to ensure that the Company meets its maturing obligations.

4.5.1 Management of liquidity risk

Cash flow forecasting is performed by the Finance and Accounts Directorate. The Directorate monitors rolling forecasts of liquidity requirements to ensure that it has sufficient cash to meet operational needs.

The Company evaluates its ability to meet its obligations on an ongoing basis. Based on these evaluations, the Company devises strategies to manage its liquidity risk.

Prudent liquidity risk management implies that sufficient cash is maintained and that sufficient funding is available to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Company's reputation.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

4.5.2 Maturity analysis of financial liabilities

The Table below analyses the the Company's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The cash flows presented are the undiscounted amounts to be settled in future.

30 June 2026	Less than 90 days Birr'000	90 days- 1 year Birr'000	Over 1 year Birr'000	Total Birr'000
Insurance contract liabilities	6,819,993			6,819,993
Insurance payables	759,628			759,628
Other liabilities	524,541	125,179		649,720
Lease liabilities			13,097	13,097
Total financial liabilities	8,104,162	125,179	13,097	8,242,438

30 June 2025	Less than 90 days Birr'000	90 days- 1 year Birr'000	Over 1 year Birr'000	Total Birr'000
Insurance contract liabilities	4,270,332			4,270,332
Insurance payables	570,608			570,608
Other liabilities	301,448	93,048		394,496
Lease liabilities			14,748	14,748
Total financial liabilities	5,142,388	93,048	14,748	5,250,184

4.6 Market risk

Market risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market risk factors such as interest rates, foreign exchange rates, equity prices, credit spreads and their volatilities. Market risk can arise in conjunction with trading and non-trading activities of a financial institutions.

The Company does not ordinarily engage in trading activities as there are no active markets in Ethiopia.

4.6.1 Management of market risk

The main objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

4.6.2 Monitoring of market risk

Market risk is monitored by the Risk Management Unit on regularly, to identify any adverse movement in the underlying variables.

(i) Interest rate risk

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Exposure to this risk primarily results from timing differences in the repricing of assets and liabilities as they mature (fixed rate instruments) or contractually repriced (floating rate instruments).

The Company monitors this exposure through periodic reviews of the assets and liability position. Estimates of cash flows as well as the impact of interest rate fluctuations relating to the investment portfolio and insurance provisions are modeled and reviewed . The overall objective of these strategies is to limit the net change in value of assets and liabilities arising from interest rate movements. While it is more difficult to measure the interest sensitivity of insurance liabilities than that of the related assets, to the extent that such sensitivities are measurable then the interest rate movements will generate asset value changes that substantially offset changes in the value of the liabilities relating to the underlying products.

The Company is also exposed to the risk of changes in future cash flows from fixed income securities arising from the changes in interest rates.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

The table below sets out information on the exposures to fixed and variable interest instruments.

30 June 2026	Fixed Birr'000	Non-interest bearing Birr'000	Total Birr'000

(ii) Foreign exchange risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in foreign exchange rates.

(iii) Price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market

4.7 Capital management

The Company's objectives when managing capital are to comply with the capital requirements set by the National Bank of Ethiopia, safeguard its ability to continue as a going concern, and to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Board of Awash Insurance S.C. agreed to inject more funds (as Qard-al- Hassan or interest-free loan) from the Shareholders Fund into the Participants Common Funds whenever there is an underwriting deficit. The Qard-al-Hassan or Interest-free loan shall be written-off if it could not be recouped after 5 years as a result of negative performance of the Takaful Window operation.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

4.7.1 Margin of Solvency ratio

According to the Licencing and Supervision of Insurance Business Margin of Solvency (MOS) Directives No. SIB/45/2016 of the National Bank of Ethiopia, an insurer carrying on general business shall keep admitted capital amounting to the highest of 25% of its technical provisions, or 20% of the net written premiums in the last preceding financial year, or the minimum paid up capital. An insurer carrying on long term insurance business shall keep admitted capital amounting to the higher of 10% of technical provisions or the minimum paid up capital.

MOS ratio is the excess of assets over liabilities maintained for general and long term insurance business. Admissable assets and liabilities stated below is in accordance with the MOS Directives No. SIB/ 45/ 2016.

5 Segment information

Segment information is presented in respect of the Company's business segments which represents the primary segment reporting format and is based on the Company's management and reporting structure. Revenue in these segments is derived primarily from insurance premium and investment income. Expenses for corporate units that render services for all business segments are initially paid by the general business segment and transferred to other business units at cost price. The expenses are allocated based on service man hours rendered by the corporate units to the various business segments.

Business segments

The Company operates the following main business segments:

Non- life (general) business- Includes general insurance transactions with individual and corporate customers. This segment covers the protection of customers' assets (particularly their properties, both for personal and commercial business) and indemnification of other parties that have suffered damage as a result of customers' accidents. All contracts in this segment are short term in nature.

Life business- Includes life insurance policies with individual and corporate customers. This segment covers the protection of the Company's customers against the risk of premature death, disability, critical illness and other accidents.

The segment information provided by the Management Operations Committee for the reporting segments for the year ended 30 June 2026 is as follows:

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

b Reconciliation of effective tax to statutory tax

The tax on the Company's profit before income tax differs from the theoretical amount that would arise using the statutory income tax rate as follows:

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Profit before tax	1,833,129	1,107,545
Income taxed at source		
- Interest income from deposits		(444,122)
- Income from dividend	(581,163)	(342,239)
-Adjustment of taxable depreciation	(33,484)	(26,425)
-Non-deductible expenses	215,163	222,225
Total taxable Income	1,433,645	516,984
Tax calculated at statutory tax rate of 30 %	430,094	155,095

Depreciation for Company income tax for fixed assets acquired after the effective date of Income Tax Proclamation No. 979/2016 & Council of Ministers Regulation No. 410/2017, as per Art. 67 is calculated by diminishing system other than buildings while fixed assets acquired prior to the above mentioned proclamation is depreciated as follows. i. Fixed assets with positive balance in a depreciation basis in the pool at a commencement of the Proclamation are depreciated at the following rates per annum.
- Buildings 5%, using straight-line method,
- Computers, information systems, software products and data storage equipments 25%,
- All other Assets 20%

ii. Depreciable assets acquired on or after the commencement of the Proclamation are depreciated by applying the following rates per annum against the net book value of the assets.
- Buildings 5%, using straight-line method,
- Computers, information systems, software products and data storage equipments 20%,
- All other Assets 15%

c Current income tax liability

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Balance at the beginning of the year	155,095	107,706
Charge for the year:		
Current income tax liabilities	430,094	155,095
Payment during the year	(155,095)	(107,706)
Balance at the end of the year	430,094	155,095

d Current income tax liability- takaful

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Balance at the beginning of the year	4,113	2,966
Charge for the year:		
Takaful Income tax expense	(9,969)	4,113
Payment during the year	(4,113)	(2,966)

A reconciliation of the allowance for impairment loss for insurance receivables is as follows:

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
At 1 July	12,642	25,403
Charge for the year	(2,942)	(4,573)
As at 30 June	9,700	12,642

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
16 Reinsurance assets		
Recoverable from reinsurers	55,263	38,702
Recievable from local insurance	-	89,473
	55,263	**128,175**
Reinsurance assets	3,054,862	1,270,721
	3,110,125	1,398,896
provision for Reisurance asset	(1,058)	(1,058)
	3,109,067	**1,397,838**

The asset for reinsurance contracts represent the estimated amounts which, together with estimated future ceded premiums and finance cost, will provide for outstanding claim recoveries, estimated future benefits payout recoveries and expenses on in-force reinsurance contracts. The reinsurance contract assets include the risk adjustment to cover volatility in experience as well as discounting.

Notes to the Financial Statements
For the year ended 30 June 2026

A reconciliation of the allowance for impairment losses for other receivables, is as follows:

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
At 1 July	8,002	6,515
Charge for the year	(111)	1,487
Recoveries	-	-
As at 30 June	7,891	8,002

18 Salvage property held for sale

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Salvage property held for sale	61,590	67,835

The movement in salvage properties held for sale is as follows:

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
As at 1 July	67,835	49,970
Additions(deduction) during the year	(6,245)	17,865
As at 30 June	61,590	67,835

These assets represent salvage properties that are fully or partially damaged and fully compensated to the policy holder by the Company. These assets are recognized and classified as held for sale in the financial statement by their carrying amount and fair value less cost of disposal as per IFRS 5.
The Company's Management practice regarding these assets is to dispose through public auction. These assets will not be held for more than a year from the date of compensation and their carrying value will only be recovered through disposal rather than continuing use.

Direct operating expenses from property that generated rental income		
	35,516	26,251

b Fair value measurement of the Company's investment properties

The Company's investment property is measured at fair value. These properties include those held for rental purposes. There are currently no restrictions on the realisability of these properties.

Investment property is initially measured at cost including transaction costs and subsequently measured at depreciated cost (less any accumulated impairment losses). Depreciation is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives of 50 years. The fair value of investment properties has been disclosed as required.

The fair value of the Company's investment property as at the reporting date and has been arrived at by independent professional and qualified estate surveyors and valuers. These valuers have appropriate qualifications and recent experience in the valuation of properties in the relevant locations. The fair value was determined based on the replacement cost concept which approximates the estimated amount for which a property should exchange on the date of valuation between knowledgeable willing parties in an arm's length transaction after proper marketing, prudently and without compulsion. This implies a market comparable approach that reflects the recent transaction prices for similar properties. In estimating the fair value of the properties, the highest and best use of the properties is their current use. There has been no change to the valuation technique during the year.

c Fair value hierarchy

Details of the Company's investment properties and information about the fair value hierarchy are as follows:

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000

23 Statutory deposits

This ralates to the amount deposited with National Bank of Ethiopia in line with Article 20 of the Insurance Business Proclamation No. 746/2012 as amended by the Insurance Business(Amendment) Proclamation No.1163/2019. The law requires that in respect of each main class of insurance, the insurer carries an amount equal to 15% of the Company's paid up capital in cash or government securities.

The statutory deposit below includes Birr 391,876,225 (2025: Birr 107,591,225) out of it Birr 391,877,000 is transferred to Ethiopian Government Saving Bond for Great Renaissance Dam. The Bond bears interest income of 8% per annum.

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Statutory deposits	506,402	391,877

The movement during the year is as follows:	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
As at 1 July	391,877	284,286
Additions	66,311	105,149
Interest received on statutory deposit invested in Government Bond	14,101	(8,171)
Interest receiveable on statutory deposit invested in Government Bond	34,113	10,614
As at 30 June	506,402	391,877

Although the minimum balance required to be set aside is Birr 506,295,300(2026: Birr 113,259,000), accrued interest receiveable on the statutory deposit transferred to Ethiopian Government Savings Bond of Birr 20,468,301 have been included in the disclosure .

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

24 Insurance contract liabilities

24(a) GENERAL BUSINESS

Awash Insurance has adopted the Premium Allocation Approach (PAA) for the measurement of all general insurance and reinsurance contracts held

under the PAA,
•Liability for Remaining Coverage (LRC) is calculated as:
a) LRC = UPR – DAC
•Liability for Incurred Claims (LIC) is calculated as:
a) LIC = Best Estimate Liability(BEL) + RA - DC

The liabilities for insurance contracts represent the estimated amounts which, together with estimated future premiums and net investment income, will provide for outstanding claims, estimated future benefits and expenses on in-force insurance contracts. The insurance contract liabilities include the risk adjustment to cover volatility in experience as well as discounting.

2026	UPR	DAC	Loss Component	Outstanding Claims	ULAE	IBNR	Risk Adj	Effect of Discounting	Total

Notes to the Financial Statements
For the year ended 30 June 2026

4(b) LIFE BUSINESS

The liabilities for insurance contracts represent the estimated amounts which, together with estimated future premiums and net investment income, will provide for outstanding claims, estimated future benefits and expenses on in-force insurance contracts. The insurance contract liabilities include the risk adjustment to cover volatility in experience as well as discounting.

2026

4(c) TAKAFUL BUSINESS

The takaful liabilities for insurance contracts represent the estimated amounts which, together with estimated future premiums and net investment income, will provide for outstanding claims, estimated future benefits and expenses on in-force insurance contracts. The insurance contract liabilities include the risk adjustment to cover volatility in experience as well as discounting. The insurance contract liabilities include the outstanding reported claims and the incurred but not reported claims (IBNR). IBNR is estimated using standard factor actuarial techniques as the period of operation of the takaful business is short. Liability for the future is the unearned premium reserve determined using the 365ths method

The asset for reinsurance contracts represent the estimated amounts which, together with estimated future ceded premiums and finance cost, will provide for outstanding claim recoveries, estimated future benefits payout recoveries and expenses on in-force reinsurance contracts. The reinsurance contract assets include the risk adjustment to cover volatility in experience as well as discounting. The reinsurance asset represents the share of insurance contract liabilities that has been ceded to the reinsures/ co-insurers. The reinsurance asset is determined using the same methodologies as for insurance contract liabilities.

Surplus/deficit in participants' fund
If the surplus in the participants' fund is sufficiently large, it will be distributed between participants after accounting for reserves and recommendation of Shari'a Advisory Council and its approval by the Board of Directors. Any remaining amount after the distribution of such surplus remains in the participants' fund.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

29 Defined benefit obligations

The Company operates an unfunded severance benefit plan for its employees who have served the Company and are below the retirement age (i.e. has not met the requirement to access the pension fund). The Severance Benefit Entitlement is provided under the Labour Proclamation No. 1156/2019.

Description of the plan:
If an employee is terminated due to redundancy, in the first year, the pay is thirty times the average daily wages of the last week of service.
If less than one year service, severance pay is calculated in proportion to the period of service .
For more than one year service, payment is increased by a third of the benefit for every additional year of service provided that the total amount does not exceed twelve months' wage of the employee.
This benefit is also entitled to employees in the event of death in service, voluntary resignation and disability after 5 years of service.

Key Risks
The key risks associated with the severance benefit entitlement are as follows:
1. The benefits are linked to salary and consequently have an associated risk to increases in salary.
2. The benefits are defined as per the Labour Proclamation. Amendments to the Labour Proclamation could change these benefits and materially change the costs of the Company.
3. The severance benefit is unfunded with no separate assets, investment risk would therefore not arise.
4. Severance benefits are payable where an employee's contract of employment is terminated by the initiation of the employer against the provision of Law. The actual cost to the Company of the benefits is therefore subject to the demographic movements of employees.

Below are the details of movements and amounts recognised in the financial statements:

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
A Liability recognised in the financial position		
Defined benefit obligations	30,589	23,304

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
B Amount recognised in the profit or loss		
Current service cost	7,285	195
Interest cost	431	2,368
	7,716	2,563

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
C Amount recognised in other comprehensive income:		
Remeasurement (gains)/losses arising from changes in the financial assumptions	13,960	5,759
Defined benefit obligations	(1,987)	8,201
Tax credit /(charge)		
	11,973	13,960

The movement in the defined benefit obligation over the years is as follows:

	June 2026 Birr'000	June 2025 Birr'000
At 1 July	23,304	23,109
Current service cost	996	6,029
Interest cost	431	2,368
Remeasurement (gains)/ losses	1,987	(8,201)
Benefits paid	3,871	
As at 30 June	30,589	23,304

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

D Assumptions

The significant actuarial assumptions were as follows:

i) Financial assumption: long term average

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Discount Rate (p.a)	17.00%	14.75%
Rate of Pension Increase (p.a)	19.75%	15.5%
Average Rate of Inflation (p.a)		

ii) Mortality in Service

The rate of mortality assumed for employees are those according to the A1949/52 as published by the Institute of Actuaries. These rates combined are approximately summarized as follows:

Age	Mortality rate Male %	Female %
20	11.1%	11.1%
25	11.2%	11.1%
30	11.6%	11.3%
35	13.2%	12.0%
40	18.8%	14.7%
45	33.0%	23.1%
50	59.9%	42.0%
55	1.0%	75.0%
60	1.7%	1.3%

iii) Withdrawal from Service

The withdrawal rates are believed to be reasonably representative of the Ethiopian experience. The valuation assumed that resignation rates to be 1% to 2.5% at age 45 to 35 respectively. 6% at age 30, 12% at age 25, 15% at age 20 (and below) to 0% at age 50 and above.

The sensitivity of the overall defined benefit liability to changes in the weighted principal assumption is:

	Impact on defined benefit obligation						
	As at 30 June 2026					As at 30 June 2025	
	Scenario 1 Base	Scenario 2 Discount Rate Increased by 1%	Scenario 3 Salary Rate Decreased by 1%	Scenario 4 Discount Rate Increased by 10%	Scenario 5 Salary Rate Decreased by 10%	Impact of an increase Birr'000	Impact of a decrease Birr'000
Discount rate	18.00%	18.00%	17.00%	18.00%	18.00%	15%	15%
Salary increase rate	18.75%	19.75%	18.75%	18.75%	18.75%	15%	16%
Net liability at start of period	23,305	23,305	23,305	23,305	23,305	23,110	23,110
Expense recognised in PL	7,456	7,456	7,456	7,456	7,456	6,029	6,029
Expense recognised in OCI	4,355	6,631	6,714	5,307	3,392	4,107	887
Employer contributions	(4,525)	(4,525)	(4,525)	(4,525)	(4,525)	(8,202)	(8,202)
Net liability at end of period	30,590	32,866	32,949	31,542	29,627	25,044	21,824

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the statement of financial position.

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

30 Qard

Qard is interest-free loan from the Shareholders Fund for the purpose of meeting the minimum required margin of solvency and to cover underwriting deficit in takaful operations. The Qard shall be recouped out of future underwriting surpluses of takaful operations

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Qard	25,000	9,000

31 Share capital

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Subscribed:		
8,000,000 ordinary shares of Birr 500 each	4,000,000	4,000,000
Issued and fully paid:		
Ordinary shares of Birr 500 each	3,375,302	2,647,210
Share premium	92,654	68,379

The Company was registered and had secured license number 003 from the National Bank of Ethiopia on 1st October 1994 to engage in General and Long Term Insurance Busineses. Total subscribed shares at the Balance sheet date was Birr 4,000,000,000 out of which (2025: Birr 725,717,700) was paid.

The paid up capital of the Company is as shown below:

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
	3,255,302	2,527,210
Non- life	120,000	120,000
Life		
	3,375,302	2,647,210

Share premium represents the excess of contributions received over the nominal value of shares issued.

32 Earnings per share

Basic earnings per share (EPS) is calculated by dividing the profit after taxation by the weighted average number of ordinary shares in issue during the year.

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Profit attributable to shareholders	1,403,036	956,767
Weighted average ordinary shares in issue with a value of:	3,375,302	2,647,210
Basic & diluted earnings per share (Birr)	0.42	0.36

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. There were no potentially dilutive shares at the reporting date (30 June 2025: nil) hence the basic and diluted loss per share have the same value.

AWASH INSURANCE S.C.

	731	570

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

37 Contingent liabilities

Claims and litigation

The Company, like all other insurers, is subject to litigation in the normal course of its business. The Company does not believe that such litigation will have a material effect on its profit or loss and financial condition.

The Company, together with other industry members, will participate on litigations mainly relating to the insurance coverage contained in the casualty insurance contracts it issued. If the courts continue in the future to expand the intent and scope of coverage contained in the insurance contracts issued by the Company, as they have in the past, additional liabilities would emerge for amounts in excess of the carrying amount held. These additional liabilities cannot be reasonably estimated but could have a material impact on the Company's future results. The liabilities carried for these claims as at this year end are reported in Note 27 and are believed to be adequate based on known facts and current law.The Company, like all other insurers, is subject to litigation in the normal course of its business. The Company does not believe that such litigation will have a material effect on its profit or loss and financial condition.

Dividend tax

The Ethiopian Federal Revenue Authority by its letter issued on 29 th May 2026 has notified the company an additional dividend tax of Birr 56,117,696.90 before interest and penalty on the dividend capitalised by the shareholders for the year 2016 E.C.

38 Commitments

Right of use asset commitments - Company as lessee

The Company leases various properties under various non-cancellable lease agreements. The lease terms are between 36 and 60 years, and these lease agreements can be renewed at the end of the each lease period.

The future aggregate minimum lease payments under non-cancellable leases are as follows:
The company acquired land on lease terms for 32 years with annual payment of Birr 2,374,689.93 which is discounted at annual interest rate of 9.5%

	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
No later than 1 year	-	-
Later than 1 year and no later than 2 years	2,375	2,375
Later than 2 year and no later than 5 years	7,124	7,124
Later than 5 years	52,242	54,617
Total	61,741	64,116

Reconciliation of Lease liability	As at 30 June 2026 Birr'000	As at 30 June 2025 Birr'000
Present value of outstanding lease as at June 30, 2026	13,097	14,748
Interest over the lease period	48,644	49,368
Outstanding lease as at June 30 2026	61,741	64,116

39 Events after reporting period

In the opinion of the Board of Directors, there were no significant post balance sheet events which could have a material effect on the state of affairs of the Company as at 30 June 2026 and on the profit for the period ended on that date, which have not been adequately provided for or disclosed.

40 Actuarial valuations

The latest available actuarial valuation of the life business was performed as at 30 June 2026. The book value of the life funds as at that date was Birr 408,379,438 over its net actuarial liabilities. The valuation of the Company's life business funds as at 30 June 2026 was carried out by actserv (Actuarial Services (EA) Ltd).

The valuation was done on the following principles:

AWASH INSURANCE S.C.

Notes to the Financial Statements
For the year ended 30 June 2026

Individual life assurances and annuities

i The Gross Premium Valuation ('GPV') method was used in arriving at the liabilities which have been stated in this report

ii he GPV liability was used for individual life business and was calculated by projecting all future expected cash-flows on each policy and discounting them at an applicable interest rate as shown in the formula below.
pv of futurebenefits+ pv of bonuses+ pv of expenses– pv of premiums

iii. General Measurement Model (GMM) was applied forindividual life policies, reflecting their long-term nature

iv. Group Life Liabilities have been determined using methods applied to determine short term insurance liabilities

v. Additional risk margins over the best estimate liability, where the best estimate assumptions are increased or decreased

vi. The CSM is calculated at the inception of the contract and is then amortized over the coverage period

Group life
For group term assurances and Group Medical assurances, the reserve has been determined as the sum of:

* Premium Allocation Approach (PAA) is adopted for the measurement of Group Life insurance contracts and reinsurance contracts held
* • Liability for Remaining Coverage (LRC) is calculated as:
  i) LRC = UPR – DAC
  • Liability for Incurred Claims (LIC) is calculated as:
  i) LIC = Best Estimate Liability(BEL) + RA - DC
* IFRS 17 standard allows for the adoption of PAA for insurance contracts with a term of a year or less. The standard also requires that the result obtained when PAA is used is not materially different from that obtained by applying the GMM (General Measurement Model) approach
* PAA stems from the assessment of standard policy durations, majority of group life insurance contracts considering risk adjustment and discounting
* The CSM is calculated at the inception of the contract and is then amortized over the coverage period

vii . Contingency reserve of Birr 9,000,000 is included as part of liability in respect of possible mortality costs and to allow normal flactuations in calims payment and investment return from life fund

Assumptions

viii. The Gross Premium Valuation reserves are then computed by deducting the present value of future income from the present value of future outgo at the prescribed valuation rate of interest.

Mortality assumptions were based on the KE 07-10 mortality tables for assured lives with a loading of 150%.

The valuation rate of interest assumed was 10.28% p.a.

The Fixed Per Policy expense assumption was Birr 1,600 Per annum.

The Expense inflation rate assumed was 19.9%.

The commission assumptions for Individual life policies were as follows;

Type of product	**Commission rate (%)**		
	1st year	2nd year	3rd year+
5 years endownment	10	3	3
10 years endownment	25	3	3
15 years endownment	35	5	5
20 years endownment	50	10	5
60 years endownment Annuity	60	10	5
65 years endownment Annuity	60	10	5

ACTUARY CERTIFICATE

I have conducted an actuarial valuation of the general insurance, takaful insurance, life insurance liabilities and severance benefits of Awash Insurance Company S.C.

The valuation was conducted in accordance with generally accepted actuarial principles and IFRS 17 reporting requirement. These principles require that prudent provision for future outgo under contracts, generally based upon the assumptions that current conditions will continue. Provision is therefore not made for all possible contingencies.

In completing the actuarial valuation, I have relied upon the data provided and the financial statements by the Company. In my opinion,

i. The actuarial value of the liabilities in respect of all classes of general insurance business of the company reflect a fair value as at 30 June 2026;

ii. The actuarial value of the liabilities in respect of all classes of takaful insurance business of the company reflect a fair value as at 30 June 2026;

iii. The actuarial value of the liabilities in respect of all life assurance business did not exceed the amount of reserves of the life assurance business at 30 June 2026; and

iv. The severance benefit liability as at 30 June 2026 can be incorporated in the financial statements in line with the International Accounting Standards 19.

Signed in my capacity as an employee of Actuarial Services(EA) Ltd.
